

## SendSuite® Tracking Online

# Simplify your inbound package management.

### Save time and money by increasing the efficiency of your receiving process.

SendSuite Tracking Online is a SaaS-based solution that streamlines the logging, tracking and managing of packages and important mail. You gain better visibility on what comes into your organisation and where it goes. That makes the entire process more accurate and efficient.

### SendSuite Tracking Online helps:

- Minimise errors related to manual entry of information.
- Reduce time spent searching for delivered items.
- Free up staff to focus on their primary work.
- Improve customer service by providing faster, more accurate responses to questions about delivery status.
- Lower IT costs related to installation, support and upgrades.

### Say goodbye to lost or misplaced packages.

With SendSuite Tracking Online, all you need to do is scan the barcode on a package or piece of mail. From that point until it's received by someone in your organisation, everything you need to know is right at your fingertips. There's no special training required and real-time email/chat/phone support options are available.

### Additional features include:

- Dashboard view of package status.
- E-mail notifications to alert recipients of package delivery.
- Options for scanning, tracking and capturing delivery signatures.
- Scalable, so you can add more users and features as your business grows.
