

# PlanetPress Mail

Increase mailroom productivity  
and maximise postal savings

Planetpress mail is designed to help customers eliminate the manual and repetitive tasks surrounding the mail preparation process allowing you to save time and maximise postal discounts.

Planetpress mail allows mailroom operators to create and manage custom mail preparation workflows

## Solving common issues

- **Manual Processes**
- **Repetitive tasks**
- **High postage costs**

### Sorting

Pre-sort your address file according to the delivery destination postcode to benefit from postal discounts.

### Document matching & grouping

Combine multiple documents from various sources into a single envelope to reduce the number of envelopes and associated costs such as postage fees.

### Envelope management

Create custom enveloping processes to generate batches for mailings that fall within different postage and weight classes.

### Batch splitting

Separate print jobs into more manageable sub-groups based on triggers such as page count or media type.

### Insert management

Manage envelope and inserts by adding barcodes and OMR to produce jobs faster and ensure mail integrity, maximising the value of your inserters.

### Address validation & correction

Connect to third-party address cleansing engines to validate addresses prior to pre-sorting.
