

Shipping & Mailing

Outbound and Inbound Package Management

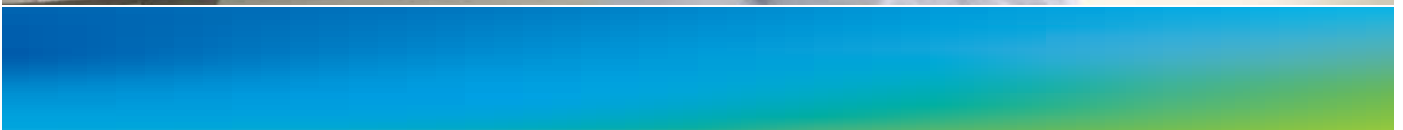

SendSuite® Live

Improve your shipping and your company's bottom line.

Running a mail centre today is a highly complex task. You not only process mail, but also send out urgent parcel and document shipments. To succeed, you need to be an expert in shipping management and do more with less support. With carrier costs increasing, shipping is a significant expense that impacts your company's bottom line. Single carrier systems combined with fragmented processes can obstruct your ability to reach critical organisational goals.

Better decisions happen in real-time.

SendSuite Live is a multi-carrier, web-based platform solution that automates parcel processing. It gives you the power to make informed business decisions based on delivery objectives, rates, service levels and business rules. Whether you're running a single mail centre or a global mail centre operation, SendSuite Live is designed to improve parcel shipping for your business.

Improve the effectiveness of your operations.

Controlling and reducing costs is a number one business objective today. With the SendSuite® Live solution, you'll be able to:

- Evaluate carrier costs and surcharges.
- Automate and streamline internal processes, as well as dashboard indicator visibility into your entire shipping operation.
- Get access to data in the mail centre. This enables you to make the right decision on everyday transactions that impact your organisation's bottom line.

Take control of your shipping costs.

- Get access to competitive rates and services across multiple carriers.
- Gain up-front visibility to carrier surcharges.
- Choose alternate services or carriers to minimise charges.
- Pick the best service possible based on the needs and rules of your business.

A process that works the way you need it to

- Minimise manual input and reduce processing errors with integration to your CRM and ERP systems.
- The simple and intuitive user interface makes shipping correctly easier for your users.
- Automatically produce shipping labels and electronically access necessary supporting documentation.

Amazing visibility across your entire operation

- Account for expenses with consolidated reporting that tracks in detail for multiple carriers.
- Design and generate reports from a wide range of data sources. This allows you to comprehensively analyse your operation's shipping systems.
- Get rapid access to delivery information. That helps to improve customer service times.

We're here to help.

The experts at Pitney Bowes know logistics. We've been helping customers determine – and achieve – the best way to manage their shipping operations for decades. We work with each of our clients to solve their unique situation and create solutions that will help make their business run more productively and profitably, now and in the future.
