Outbound and Inbound Package Management

Shipping APIs

Easily integrate USPS services into your platform.

Streamlined shipping just got easier.

Consumers don't care that shipping is complex, but they do care about receiving their shipments on time and as promised. The Pitney Bowes Shipping APIs help you solve complex shipping issues simply and efficiently.

Now you can offer USPS shipping through your current operational flows. Lightweight, easy-to-use and featuring a seamless integration process, our Shipping APIs don't require extensive time or investment. Simply sign up, get your keys and drive.

Pitney Bowes has nearly a century of postal experience as well as over 10 years of private API experience. Working on some of the world's largest e-commerce platforms gives us deeper knowledge that will help you integrate with ease.

Ready to rollout

Our lightweight, easy-to-use Shipping APIs are built on flexible and RESTful principles so you can deliver the functionality demanded by today's consumers. With our APIs you can:

- Streamline postage account registration.
- Enable individual shippers to activate accounts in minutes.
- Optimize your services through our flexible Developer Portal.

Reliability that delivers for you and your customers.

Reduce efforts and expenses.

The Pitney Bowes Shipping APIs let you present customers with the best available rates, without special forms or Post Office drop-off required. Customers will be able to generate shipping labels for all domestic and international shipments, track packages from origin through delivery and provide simple, effective reports for managing postal shipments and expenses.

Build business for your customers.

Pitney Bowes Shipping APIs ensure security and reliability. Each year, over one million customers build their businesses with our robust account-management platforms.
