We simplify the logistics of parcels.

We pick-up your parcels, with the same driver and vehicle that we use to pick up your letters. Your parcels are sorted utilizing software and hardware developed by Pitney Bowes. Then, the parcels are processed using the same Presort Services platform used for letters and flats. Your parcels are inducted into the USPS® network, as close as possible to the end recipient for optimized delivery. Plus, we provide flexible payment options that make it easier for you to do business the way you want to.

Streamline your operations and impact your bottom line.

Discounts count.

Our facilities are “clustered” in what we call Mail Exchange groups. This allows us to maximize your discount by processing parcels to its ultimate sort and inducting it closer to its final destination. The Mail Exchange technologies and proven efficiencies get your parcels where they need to be, faster and more cost effectively.
