Kodak Alaris IN2 ecosystem

Give productivity a major lift.

Adaptable solutions for your ever-changing workplace.

A new standard in efficiency and consistency.

The Kodak i3000 Series Scanners are purpose-built to deliver consistent throughput and minimise downtime for your office. These A3 rotary scanners can take on virtually any challenge while taking up less space on your desk—making them the perfect fit for any business that doesn't have a second to waste.

The Kodak Alaris IN2 ecosystem

Mission accomplished

Work interruption-free with a design and features that anticipate workflow issues and power past them.

Alaris Perfect Page technology optimises image quality and intelligently manages a host of image processing tasks. It all happens automatically, with every scan.

Sharper images make additional processing functions such as optical character recognition (OCR), more accurate.

Built for ease, productivity, and longevity

Reliability is performance for the long run and the freedom to focus on what matters most in business.

Prevent document damage, safeguard data, and spend less time on rescanning with Intelligent Document Protection (IDP)—it listens for problems and alerts you before they become jams or misfeeds.

Handle a wide range of exception documents with ease with an integrated book-edge A4 flatbed (on Kodak i3250 and i3450 Scanners)—ideal for book pages, passports, folders, and fragile documents.

Intelligent, integrated, and ready when you are

Save time and effort, and get exceptional value, with scanners that think and work like you do. For example, intelligent barcode reading delivers data to applications.

Easily integrate your scanner with all TWAIN, ISIS, and Linux based scanning applications so managing data is as easy as scanning documents. Works in Windows, and Linux environments.

Straightforward user experience

Alaris delivers intuitive interfaces, onetouch scanning, and other easy-to-use features, for a simplified user experience.

Alaris Smart Touch technology uses onetouch scanning process with the touch of a button. Preprogram up to 20 jobs to automatically scan hard copies and save them as searchable PDFs, enabling you to easily search for information in the future.

Adaptable solutions for your ever-changing workplace software.

Alaris Capture Pro Software provides intelligent features such as exception checking, advanced indexing, and expert extraction to get information into your business processes faster.

Intelligent quality control automatically flags questionable images and optimizes image quality without rescanning.

Intelligent exception processing ensures immediate validation of forms so any missed information at the point of transaction is identified and fixed.

Main features:

- 1 Reliable throughput in colour or black and white, at 200 or 300 dpi, on images, text, and mixed-size documents.
- 2 Stack up the work —with a 250-sheet feeder/ elevator you can neatly and efficiently scan document batches with ease. Our design ensures continuous throughput with rapidfire scanning.
- 3 Thick materials such as cardboard and file folders, and extra-long documents, fly through the scanner thanks to the straight through paper path.
- 4 Save space with engineering that delivers robust paper transport and heavy-duty features in a compact, desktop-friendly design.
- 5 Integrated book-edge A4 flatbed scanner built right in for exception documents (*3250 and 3450 models only).
- 6 Intelligent document protection listens for problems and alerts you before they become jams or misfeeds.

Alaris IN2 Ecosystem

Today's complex data environment needs an integrated approach to information capture. The IN2 Ecosystem delivers the best information capture solution for your business with industry-leading scanners, software, and services delivered by a network of trusted partners.

IN2 Ecosystem gives you the:

Right Fit

Solutions to fit your business goals, environment, and budget.

Right Experience

Solutions that simplify your work—from acquisition, through operation and ownership.

Right Results

Solutions that deliver superior business value through fast, accurate, reliable information capture.
