

Location Intelligence

Asset Management

ConfirmWorkzone®

Process efficiency and work optimisation for work crews.

Complete control.

ConfirmWorkzone is designed to simplify the often complex relationship between local authorities, work crews, contractors and private organisations. From a central point, you can make sure crews are in the right place at the right time. It helps you reduce travel time, save energy and resources, improve service levels and hit KPIs while staying well within budget.

Simple and elegant.

A beautifully simple web-based interface focuses on a map, a job list and a work-crew diary. From there you can incorporate more detailed information around location and scheduling decisions then use colour coding to classify jobs by urgency and status. You can see the whole team at a glance which helps you prioritise, avoid duplication and eradicate missed jobs.

Key benefits.

- Reduce operational costs
- Avoid penalties for missed KPIs
- Optimise travel and working time
- Alert users to new critical tasks
- Forward plan, less fire-fighting
- Make faster, better decisions

Act in real time.

Stay on top of status updates, prioritise, reschedule, reroute and reassign. Data captured by ConfirmConnect® devices gives you the insight to improve the whole team's performance, here and now.

Stop looking at data and start using it.

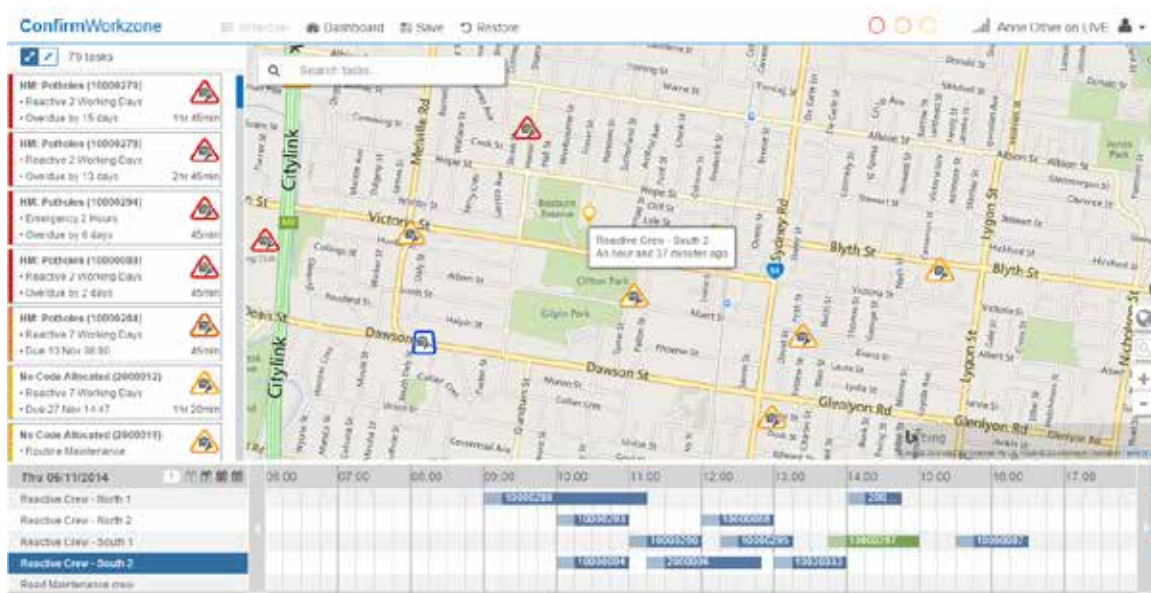

With everyone using the same system, in real time, data can turbocharge your decision making. Multiple layers of information such as crew location, date restrictions, task requirements and route optimisation are shared immediately with back office and mobile devices. Documents and photographs are shared making sure everyone has the same single point of truth and a data-rich view of the work being done.

Deliver on SLAs.

Total transparency, ease of use and immediate access to mission-critical data mean you can plan ahead and hit your targets. The KPI dashboard gives you a clear sight of how you're doing against your objectives and gives you the insights you need to drive measurable improvements.

With ConfirmWorkzone, the team works.

For more information, visit pitneybowes.com/au/confirm or call your nearest office below.

The user is automatically alerted to new critical tasks which can then be assigned to the nearest available work crew ensuring quick action.
