

# Water authority's communications flow more easily with an integrated Pitney Bowes solution

---

## Customer profile

### Las Vegas Valley Water District (LVVWD)

- Not-for-profit agency that has been providing water to the Las Vegas Valley since 1954
- Challenged with communicating with a growing customer base of 330,000 individual accounts
- Implemented DOC1®, CODE-1 Plus®, and MailStream Plus™ to automate bill generation process and increase productivity and cost savings

---

## Improving customer communications

The Las Vegas Valley Water District (LVVWD), located in one of the fastest-growing cities in the United States, is a not-for-profit agency that helped build the city's water delivery system and now provides water to more than one million people in Southern Nevada. The LVVWD replaced an outdated Customer Information System with the Oracle Customer Care system and a number of Pitney Bowes software solutions to address its customer communication needs.

---

## Business challenge

Located in one of the fastest growing cities in the United States, the LVVWD was challenged to communicate with a growing and transient customer base, including 330,000 individual accounts across multiple segments. With frequent address changes, LVVWD needed a solution that would ensure the accuracy of customer addresses. Automation of manual statements was another consideration. In general, the LVVWD needed to improve its billing and customer service offerings while maximizing efficiency.

*"Better formatted bills have reduced the number of customer calls that our service center receives."*

— Alisa Mann, Customer Services Manager

---

## Technology used

- DOC1 for document composition
- CODE-1 Plus for address cleansing and validation
- MailStream Plus for mail sorting and postal discounts
- EngageOne™ Vault for document archiving and access

*“Access to archived bills has made the customer service and resolution process faster and easier.”*

— Alisa Mann, Customer Services Manager

---

## Solution

The LVVWD implemented DOC1 software from Pitney Bowes, a document composition solution that automates the creation of letters, bills and statements. With the integration of DOC1 with its existing customer billing system, LVVWD was able to generate statements automatically.

In addition to DOC1, the LVVWD also implemented CODE-1 Plus from Pitney Bowes. This mailing solution provides a Coding Accuracy Support System (CASS) that helps ensure the accuracy of customer addresses.

MailStream Plus has helped the organization realize additional savings with its mail sorting capabilities. This solution provides four levels of presort savings and automatically generates the extensive audit trail and mail production reports required to speed mail preparation and postal acceptance.

Finally, LVVWD implemented EngageOne Vault, which archives customers' statements and enables customer service staff to access an online version of a customer's exact bill. When receiving a customer call, LVVWD staff members are able to quickly access and view the same

bill as the customer, providing a more personalized interaction and allowing for much quicker resolution of discrepancies or questions. Alisa Mann, Customer Services Manager, notes, “Better formatted bills have reduced the number of customer calls that our service center receives, and access to archived bills has made the customer service and resolution process faster and easier.”

## Benefits

With the implementation of document composition, archiving and mailing solutions from Pitney Bowes, LVVWD has been able to dramatically increase efficiency, productivity, and cost savings. Additional benefits include:

- Decrease in the number of returned statements due to improved accuracy of customer addresses
- Automation and integration of the customer billing system
- Improved customer experience due to better formatted, easy-to-follow billing statements
- Quicker resolution of billing discrepancies due to online access of customers' bills by customer service representatives
