Improve efficiency and safety

DL400™ high-speed letter opener

Your mail has to be opened carefully, the contents protected, ready for sorting and distribution. It can be very tedious and time-consuming. Whether you receive hundreds or thousands of envelopes daily, the DL400 high-speed letter opener makes quick work of this critical task.

The DL400 is designed for organisations with moderate to high volumes. Using advanced milling technology, the DL400 stands out from alternatives that use slicing blades or guillotine-type cutters. The milling protects contents, prevents paper cuts and minimises waste making the DL400 ideal for those who require careful opening to protect the contents of incoming mail.

Fast and productive:
Up to 400 envelopes per minute

Resettable piece count

**Protect contents
and minimise waste**

**Feed wide variety
of envelopes:
Self-adjusting
feeder**

**2 position cut
depth setting**

Compact footprint

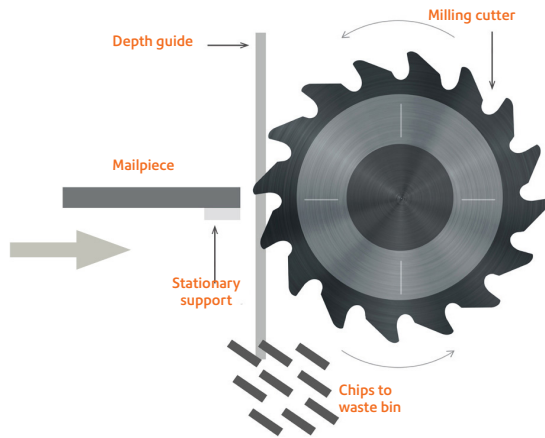

**Chip waste is stored
for easy disposal**

Handle oversized and thick envelopes

For more information, visit us online. See back for details.

Advanced technology

Using milling technology, the DL400 removes small chips from the envelope edge, thus preventing damage to the contents and leaves a soft, feathered edge that prevents paper cuts. With milling, no jogging of contents is necessary. Milling has a distinct advantage over alternatives that may damage contents, leave sharp edges and product waste that cause a jam. It allows you to feed a wider variety of envelopes and is completely safe for you and the valuable contents of your mail.

Clean operation

The DL400 minimizes waste as the tiny milled chips are whisked away and automatically discarded into an easy-to-remove bin. Plus, milling prevents jams because there are no long strips of paper left to clog a slicing blade.

Specifications

Speed	Up to 400 envelopes per minute
Envelope sizes and types	Most sizes/types of paper and cardboard (including rigid overnight packs) up to 4.8mm thick
Digital counter	Resettable six digit LED display
No cut selection	For envelope counting
Max thickness	4.8mm
Depth of cut range	Min .25 mm, up to 1.79 mm
Feeder hopper capacity	75mm
Size	1016mm L x 394mm D x 356mm H
Weight	28Kg
Power	220-240 VAC, 50HZ, 3A
Sound output	Below 80 dB
Assembled in	USA

The DL400 will carefully open your mail, at up to 400 envelopes per minute. You can open most sizes and types of envelopes, even rigid overnight packs.
