The Falcon™ Transportable Scanner

Scan anywhere. Expand your business.

Take automated, one-step scanning with you.

Maximise possibilities with Falcon™ Transportable, and Pitney Bowes.

Falcon Transportable is specifically designed for mobile scanning operations. Featuring innovative one-step drop feed scanning, it delivers unmatched performance as a high-capacity production scanner. Ready to tackle your workflow challenges, it's an ideal solution for any on-site document scanning needs.

Enhance your organisation's flexibility and functionality.

Designed for easy maneuverability in and out of vehicles including minivans, Falcon Transportable can be set-up and running on site within thirty minutes.

Falcon Transportable allows agile operators to prep and scan documents at a faster rate than the prep process of most current workflows. This function significantly reduces the preparation cost of scanning documents.

In addition, Falcon Transportable offers four advanced feeder options:

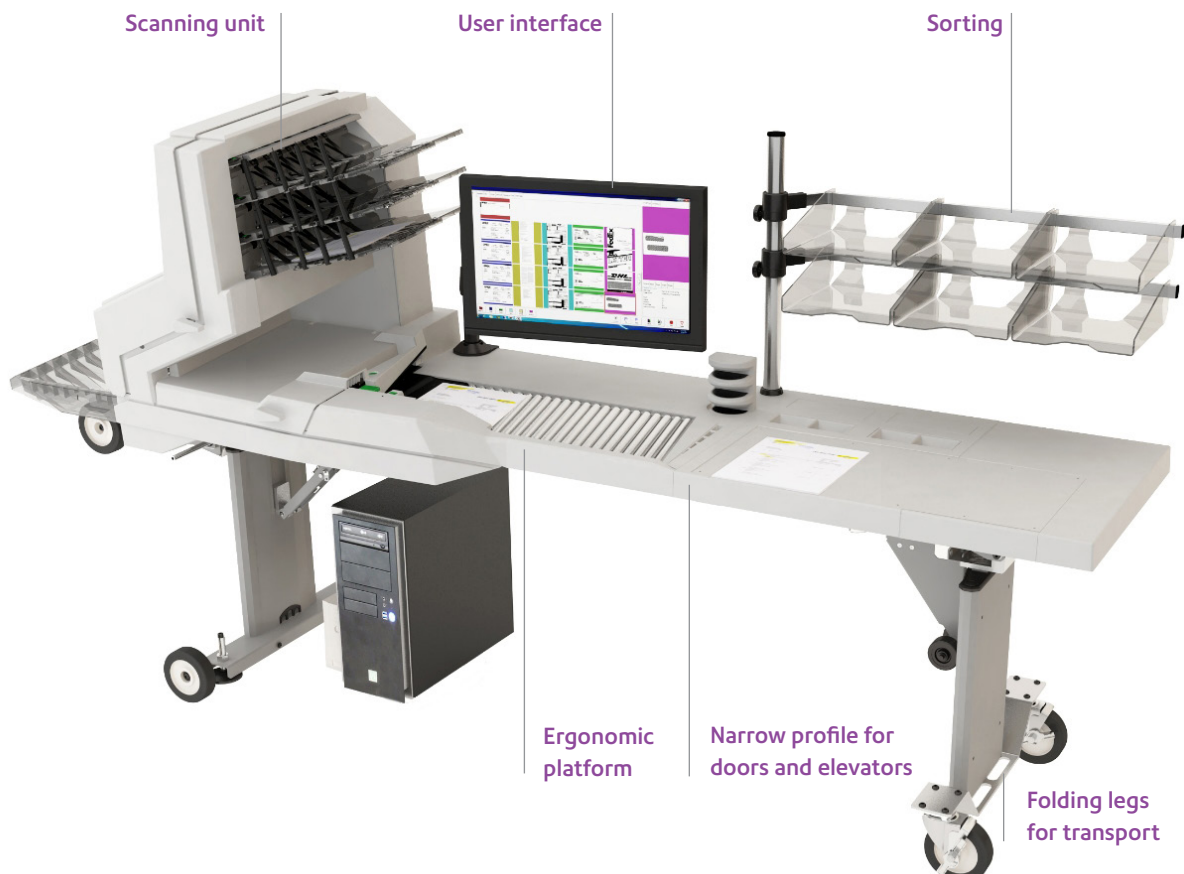

- 01. Drop
- 02. Packet
- 03. High-capacity
- 04. Rescan

The Falcon can scan an unmatched range of document types in different shapes, sizes and materials. Plus, with its optional external drive and software, Falcon images and electronically records 3D objects.

Its conveyor can hold more than 700 pages at any given time. Take advantage of maximum throughput and uninterrupted processing, no matter where you may be.

Improve efficiency and increase security.

Minimising prep, paper handling and other manual tasks improves efficiency and results in superior document integrity. Documents are removed from envelopes and scanned for operators to view them as images in real-time to ensure accurate capture and identification. This process saves time, reduces the cost of rescans and keeps the document safe.

Pitney Bowes can help you maximise your investment in the **Falcon Scanner series**.

Features and benefits

Designed for scanning operations on the go

Falcon™ Transportable is ideal for government, legal and medical scanning environments, who must remain compliant by keeping physical documents on premise.

Optionally available as a fixed workstation

Falcon can be equally configured to suit on premise installations. The same ergonomic adjustable height features and the complete scanning and software capabilities of the Falcon Transportable are also included in the fixed terminal.

Versatile feeder capabilities

The specialised feeder provides a dynamic process that is proven to reduce prep and increase scanning accuracy. Its patented drop-feed technology allows for efficient scanning directly from envelopes, while intelligent packet sensing capabilities adjust track speed for optimal throughput. The high-capacity feeder handles large stacks of mixed document types, effectively eliminating the need for additional high-volume production scanners. Plus, the rescan feeder is designed for fast, efficient rescans that won't disrupt the overall scanning process.

Productive, ergonomic design

Falcon series has a customisable work surface that fits most scanning environments. The optional motorised desk adjusts height settings for maximum operator comfort. It comes equipped with a 22-inch touchscreen monitor for enhanced viewing of scanned images and easy one-touch page-type classification.

Prep-reducing CertainScan™ 3.0 software

The feature-rich CertainScan software is designed to complement Falcon, as it provides auto-classification and an intuitive method to visually codify documents. Its versatility maximises the many features of the Falcon scanner and minimises document preparation time.

Falcon Transportable specifications:

Document feeding	High-capacity auto feed
	Continuous drop-feed
	Packet feed
	Rescan feed
Document width	2.0"-12.25" (5.08 cm – 31.12 cm)
Document length	3.5" – 25.50" (8.89 cm – 64.77 cm)
Scanning speed	Up to 110 ppm / 220 ipm @ 300 dpi
In-line recognition	OCR, OMR, barcodes, document type ID
Media detection	Multi feed detection, height, length, skew and envelope detection
Document separation	Three programmable output sort bins. One programmable straight-path sort bin for extra thick and delicate items.
Daily duty cycle	Unlimited
Maximum dimensions	(H x W x D) 69.72" x 86.38" x 31.98" (177.09 cm x 219.41 cm x 81.23 cm)
Bundled software	CertainScan™ 3.0 64 bit host software, CertainScan Essentials™, CertainScan Edit™, proprietary image and data output application and standard barcode package, Windows 7, 64 bit
Additional features	CertainScan PC – Intelligent fully configurable job interface
	Flat-panel 22" touch-screen
	Packet ID
	Early envelope detect
	IDAssist™
Popular optional features	Audit trail printing (front and rear)
	Rear graphics printer (prints signature and Code 39 barcode)
	VRS* technology image enhancement
	Key Assist™
	Reference ID
	MICR/MICR+
	Generic mount for external capture device
	Multi-page type IDAssist
	*VRS is a registered trademark of Kofax, Inc.
Available as	Falcon Transportable and Falcon
Typical applications	Government, secure legal and medical scanning environments, back file conversion, archive record management or storage facilities, educational institutions, finance and insurance document processing.
