

# Consistently deliver your message

## Mailstream Evolution™ inserting system

### Built for productivity

In today's economy everyone is expected to do more with less. Production mailers must consider every possible tactic which could help reduce costs, while meeting the SLAs their internal and external customers demand, every time.

With the Pitney Bowes Mailstream Evolution™ inserting system you can rely on consistency, predictability, integrity and flexible configuration options for higher overall productivity. The Mailstream Evolution inserter is the next generation of the world's best selling FPS™ Split Drive inserter with over 1,500 installations in the past five years.

### Built in productivity

Whether you have high or low page counts, cutsheet or continuous applications, we can help you design a system that meets your exact business needs with the highest possible productivity.

### Faster changeover

Achieve the fastest job changeover in the industry with automated job setup, linescan cameras which read all symbologies anywhere on the input document, and material handling options that can rotate, flip or turn your collation.

### Process DL up to C4 envelopes

Now you can process all your mail from DL up to C4 envelope sizes on a single system

### Dependable results, every shift

Engineered for consistent high performance operation, the Mailstream Evolution inserting system's motion control system controls, detects, corrects, slows down and/or accelerates variable thickness materials to achieve the best possible throughput. This superior paper handling helps increase uptime and substantially extends the intervals between regularly scheduled preventative maintenance.

## Recommended base configuration (built for productivity)

| Component                           | Pitney Bowes Solution   |   |
|-------------------------------------|---|---|
| <b>Inserters chassis</b>            | Mailstream Evolution™ 12-14K inserting system   | Process DL up to C4 envelopes at speeds up to 14K per hour  |
| <b>Inserters control technology</b> | Direct Connect screen   | Control and monitor mailpiece assembly with high integrity  |
| <b>User interface</b>               | Top down graphical user interface   | Help operators quickly identify and remedy stoppages  |
| <b>Input choices</b>                | Choice of integrated Advanced Productivity Inputs (API) or High Productivity Inputs (HPI) | Support cutsheet or continuous applications while processing up to 7 page tri-fold or 10 page half fold collations (80 g/m2 paper)  |
| <b>Insert feeders</b>               | Friction insert feeders with gap separation and roller-based feeding                      | Insert CDs, Z-folded, stiff booklets, open ended leading inserters, plastic cards and more  |
| <b>Output stacker</b>               | On edge envelope stacker  | Increase operator efficiency with up-right envelope stacking. (up to C5 only)   |
| <b>Automated job setup</b>          | DFWorks® Mailrun management   | Simplify inserter setup for operators   |
| <b>Reporting</b>                    | P/I™ Direct Access Productivity Reporting with idle time tracking                         | Manage resources, reduce inserter downtime and report on productivity metrics   |
| <b>Flexible service options</b>     | ServiceWorks™ Solutions   | Choose from a variety of flexible service options including, annual maintenance, on-site service, multi-vendor services, operator training, banks of hours or parts cabinet |

Mailstream Evolution™  
12-14K inserting system

## Additional options to meet specific requirements

| Challenge                                | Pitney Bowes Solution         |   |
|--|-------------------------------|---|
| <b>Face up/face down applications</b>    | Twist-No-Twist module         | Flip collations prior to entering inserter chassis  |
| <b>DL up to C4 envelope processing</b>   | A4 processing capabilities    | Process up to 80 page collations (80 g/m2 paper)  |
|  | No Changeover module          | Rotate collation from portrait to landscape for fast changeover   |
| <b>Specialised inserts</b>               | Rotary insert feeders         | Insert single panel glossy, stitched or glued booklets, multiple coupons, chromate sheet, onion skin paper and more |
| <b>Stringent SLAs</b>                    | DFWorks® Production Workflow  | Real-time job tracking and SLA monitoring   |
|  | DFWorks® Productivity Reports | Advanced productivity reporting, including multi-site reports and advanced analytics                                |
| <b>Meters</b>                            | DM Infinity™                  | Flexibility to support meter indicia's, permits, graphic options and custom logos (certain markets only)            |
| <b>Closed-faced envelopes</b>            | Envelope finishing            | Print addresses or marketing messages on envelopes  |
| <b>Individual mailpiece verification</b> | Direct Connect verify         | Identify and track the mailpiece, verify via file-based processing  |
