The FalconV™ Scanner

# The universal document scanning workstation.

# Combine the performance of a high-capacity production scanner with the unique prep-reducing process.

## Maximise possibilities with FalconV™ and Pitney Bowes.

The innovative one-step scanning process continues with FalconV. With two additional sort bins and enhanced multi-feed detection, FalconV increases the functionality and flexibility of its universal document scanning workstations. FalconV is designed to attack the most difficult and daunting workflow challenges.

### Enhance your organisation's flexibility and functionality.

FalconV allows operators to prep and scan documents faster than traditionally separate "prep then scan" processes.

This function significantly reduces the preparation cost of scanning documents.

The FalconV can scan an unmatched range of document types in different shapes, sizes and materials. The external capture arm allows 3D objects to be taken during the scan process. Its conveyor can hold more than 700 pages at any given time. Take advantage of maximum throughput and uninterrupted processing, no matter where you may be.

### Improve efficiency and increase security.

Minimising prep, paper handling and other manual tasks improves efficiency and results in superior document integrity. Documents are removed from envelopes and scanned for operators to view them as images in real-time to ensure accurate capture and identification. This process saves time, reduces the cost of rescans and keeps the document safe.

## Features and benefits

### Versatile feeder capabilities

The specialised feeder provides a dynamic process that is proven to reduce prep and increase scanning accuracy. Its patented drop-feed technology allows for efficient scanning directly from envelopes, while intelligent packet sensing capabilities adjust track speed for

optimal throughput. The high-capacity feeder handles large stacks of mixed document types, effectively eliminating the need for additional high-volume production scanners. Plus, the rescan feeder is designed for fast, efficient rescans that won't disrupt the overall scanning process.

*FalconV is designed to attack the most difficult and daunting workflow challenges.*

Pitney Bowes can help you maximise your investment in the **Falcon Scanner series**. For more information, call or visit us online.

### Specifications

Document feeding	High-capacity auto feed, Continuous drop feed, Packet feed, Rescan feed
Document width	5.08 cm – 31.12cm
Document length	8.89 cm – 64.77 cm
Scanning speed	110 ppm @ 300 dpi
In-line recognition	OCR, OMR, Barcodes, Document type ID
Media detection	Multi-feed detection, height, length, skew and envelope detection
Bundled software	CertainScan™ 4.0 64 bit host software, CertainScan Essentials™, CertainScan Edit™, OPEX Transform™, OPEX standard barcode package, Windows 10 64 bit
Daily Duty Cycle	Unlimited
Maximum Dimensions (H x W x D)	181.4 cm x 259.1 cm x 82.5 cm
Popular optional features	Audit trail printing (front and rear), Rear graphics printer (prints signature and Code 39 barcode), VRS® technology image enhancement, Key Assist™, Reference ID, MICR/MICR+, OPEX provided generic mount for external capture device, Multi-page type IDAssist, <sup>®</sup> VRS is a registered trademark of Kofax, Inc.
