Visitor Management & Tracking

LobbyTrac™ Visitor Management

The easy way to securely manage your visitors.

The all-in-one, self-service security solution.

LobbyTrac™ provides a seamless solution for managing visitor and employee traffic for any building. Its intuitive, step-by-step instructions simplifies the sign-in/sign-out process by capturing and storing all the pertinent information to a secure database. This enables real-time reporting and greatly enhances existing security processes.

Simple and intuitive

With a user-friendly touchscreen monitor, LobbyTrac captures vital visitor information. Plus, the address book feature provides a predictive-like key stroke experience that allows visitors to check in without staff involvement. The device comes with everything you need for superior visitor management including:

Customise your user-experience.

Enhance your corporate image by customising the welcome screen of your LobbyTrac with graphics, messaging and more. Plus, provide a superior user experience as you'll be able to create branded labels for added security.

Manage facility entry points with or without dedicated personnel.

Like a virtual assistant the self-serve interactive terminal can ensure better utilisation of time and resources by allowing visitors to officially notify their arrival.

The small footprint fits in any space.

With a sleek and modern design, LobbyTrac takes minimal space for installation. Set it up as an automatic, self-service office reception in your facility or to assist your lobby personnel.

Make your visitor interaction quick and efficient.

The notification feature alerts employees about visitor's arrival via email and SMS.

Strengthen duty of care and enable precise control over facilities.

Ensuring that only authorised persons are inducted to buildings or workplaces is vital to occupant safety and protection of organisational assets. LobbyTrac contributes to stronger due processes and augments existing controls to provide greater compliance with legal and procedural obligations.

In the case of emergency situations a real-time report can be produced on the spot or remotely from the cloud hosted model to inform facility managers of who is on site and how to contact them.

LobbyTrac securely eases visitor and employee management, making it ideal for organisations like:

- Schools
- Colleges and tertiary institutions
- Government agencies
- Correctional facilities
- Corporations
- Hospitals and clinics
- Real estate management
- Event management
- Facility management
