Digital Mailroom Assistant

Mail, archive and deliver digitally – wherever you are working.

Increase efficiency and reliability in delivering employee mail – at any location – with the Pitney Bowes Digital Mailroom Assistant. Our end-to-end solution streamlines the mailroom process by digitally distributing mail to recipients at a designated email address. It speeds delivery by eliminating paper and extra touchpoints. You achieve greater flexibility, productivity and cost savings.

Gain flexibility.

Pitney Bowes Digital Mailroom Assistant software integrates seamlessly with your systems and can be easily customized to your needs. Digital mail delivery keeps your employees connected and up to date on vital correspondence, no matter where they're working.

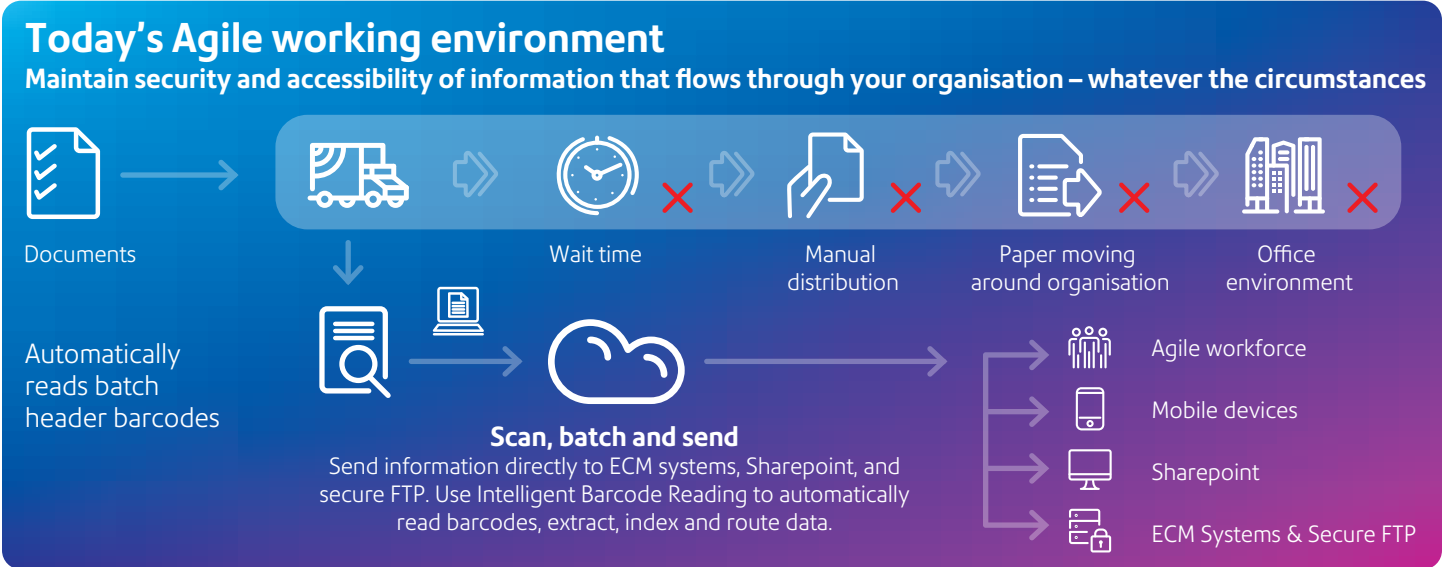

Increase productivity.

Manage tighter turnarounds to improve responsiveness, while supporting agile working. Mail will be delivered to your employees in seconds rather than hours, or even days. Streamline the entire mailroom process, avoiding unnecessary touchpoints, paper and transportation.

Control costs.

Eliminate postage expenses and labour costs of having to repackage mail and send it to employees working remotely. Pitney Bowes Digital Mailroom Assistant provides a cost-efficient way to correct items that are undeliverable as addressed.

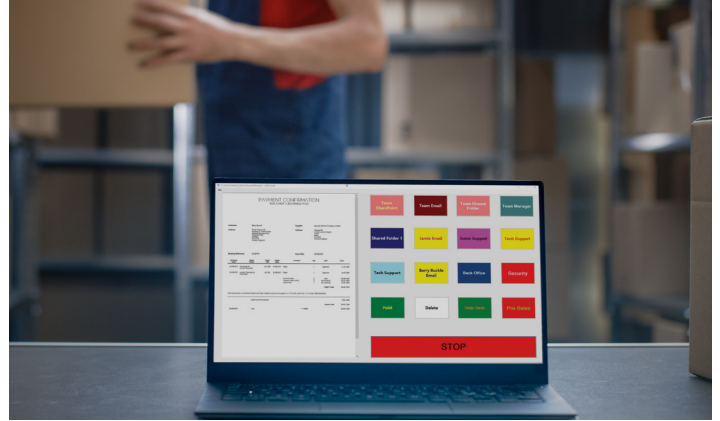

Transform your mailroom process using digital speed and efficiency.

The Pitney Bowes Digital Mailroom Assistant is a complete mail delivery solution for today's business needs. Our streamlined workflow and connector tools enable you to instantly scan physical documents on-site, then deliver them

digitally to the intended recipient. In addition, our solution is 100% compliant to regulatory archiving rules. Globally, organizations such as banks, government agencies and hospitals have converted to this modern, time-saving method.

Conventional mail processing

Digital mail processing with Pitney Bowes

The Pitney Bowes Digital Mailroom Assistant enables you to:

- Streamline your entire mailroom process.
- Remove paper from the workplace.
- Support agile working without sacrificing efficiency.
- Eliminate touchpoints that slow delivery.
- Reduce labour costs by minimizing mail handling.
- Increase mail visibility via real-time dashboards.
- Easily monitor your entire inbound mail operations.
- Reduce compliance risks with an audit trail for each incoming document.
- Make better informed decisions based on real-time information.
