

Shipping & Mailing
Address Management

DA80F and DA95F Addressing Printers

Stand out from the stack to get your message opened.

Professionally print return address and delivery address for all types of mail.

Spot colour helps you grab the attention of recipients, increasing probability that mail will be opened.

AddressRight® Addressing System

- DA80F addressing printer
- DA95F addressing printer
- StreetSweeper® mail management software

Increase speed and improve response rates.

Businesses like yours require solutions that are easy to implement and flexible enough to adapt to operational workflow changes. The Pitney Bowes DA80F/DA95F printers do precisely that by improving efficiency and the speed at which you get your mailings out the door. Now, you can drive profitability with less hassle and take on mailings with ease and confidence. With their advanced features and cutting edge technology, the high-speed DA80F and throughput leader DA95F fixed head printers:

- Are simple to set up and easy to use.
- Offer the speed you need while delivering optimum performance and durability.

Specialized features of the printer can help dramatically improve print quality:

- Precision controlled media path helps reduce jams, thus increasing uptime
- Additional sets of control rollers help the mailpiece travel through the system without delay
- Precise print head position indicators ensure your text and graphics appear precisely where you want them

Get your mail noticed with a well-designed envelope.

Utilizing the printer's extensive graphic capabilities, you can turn your envelopes into a powerful vehicle that stands out. The spot colour helps you grab the attention of recipients and increases the probability that mail will be opened.

Improve the speed and efficiency of your production mailing.

Additional features.

- The simple side guide adjustment offers a durable slide mechanism for easy handling of various media
- Increase your uptime. Our printers can be controlled from their host computer. That enables your operators to perform remote diagnostics and multitask while producing a mail run.
- The optional integrated conveyor stacker and high-output ink dryer help keep production going.
- The light mode printing offers the option to use less ink produce CPC-compliant barcodes. Our printers are also ideal for use with coated stock. Your savings can be recognized in lower cartridge use, while waste reduction helps your organization "go green."

You can turn your envelopes into a powerful vehicle that stands out. The spot colour helps you grab the attention of recipients and increases the probability that mail will be opened.

Ensure successful mailings with superior mail management StreetSweeper® Software.

Pitney Bowes DA series printers are designed to work in tandem with our StreetSweeper mail management software. This powerful and easy-to-use software cleanses and updates your existing address lists, ensuring delivery to your target customers.

StreetSweeper makes full use of your customer data to create variable messages for specific segments or to print personalized messages on the envelope. The software lowers your postage expenses by giving you access to Canada Post Corporation (CPC) presort discounts.

- Tailor the complete envelope on-screen with the envelope designer feature. In addition to adding return and delivery addresses, you can create personalized messages to every mail piece for maximum impact and response.
- Manage your mailing lists so you can target the right names and ensure list accuracy for optimum deliverability.
- StreetSweeper presort capability lets you take advantage of substantial postal discounts.
- Update your list using the latest Canada Post Point of Call Data. That helps reduce the postage and printing costs and lost responses that result from out-of-date addresses.
