Franking Machines

DM100i™ DM130i™ DM140i™ franking machines
Communicating across the world of commerce

The new frontier of franking technology.

We turn fragmentation into integration. The Pitney Bowes DM digital franking series transforms your desktop into a fully functional mail center.

The series is powered by IntelliLink®. This innovation in digital technology increases productivity and efficiency by simplifying how you ship and mail. It powers the DM100i™, DM130i™, and DM140i™ to automate mail processing and receiving. By combining the two main elements of mail processing into one easy to use machine, this series simplifies your office workflow.

Weighing.

- Integrated scale with maximum weight options
- Weigh and calculate postage in one step, without operator intervention
- Process heavy parcels with an optional 35kg scale

Postage.

- Slide your mail through the print sleeve and print postage, automatically
- Use self-adhesive tape sheet for larger mail
- Print postage up to ₹9999.99
- Connect your meter to a phone line to refill it automatically

Tracking costs and revenue.

- Transform standard mail into promotional pieces by printing advertising on the envelope at the moment of mailing
- Ensure undelivered mail is returned, mail shots are more targeted and spend reduced by printing your return address
- Track or allocate your postal spend by cost center or department using accounting mode
- Earn 3 percent discount on every franked mail

Enhancing efficiency.

- Seal envelopes at the time of franking
- Calculate proper postage for mixed size and weight pieces
- Handle mail and parcels quickly and quietly

Automating compliance.

- Access new postal rate by automatic download without any purchase of the rate PROM
- Guarantee proper handling of incoming mail by stamping the date and time of every mail piece received
