# Pitney Bowes Business Solutions

Automate your business processes to increase efficiencies and improve productivity.

# Our clients are at the centre of Pitney Bowes

We are proud to be trusted by these leading companies

# Pitney Bowes: your trusted partner for business solutions

**At Pitney Bowes, we deliver innovations that help clients automate manual processes, helping to streamline operations, improve productivity, save time and reduce cost.**

We have been innovating and creating technology solutions for more than 100 years. We support our clients with the highest-quality technologies, local expertise, services and support.

Our solutions are scalable and modular, so you can pick and choose what's right for your organisation now, and we will grow with you as your business grows. Our technologies benefit a wide range of industries including public sector, education, healthcare & aged care, manufacturing, mining, construction, and more.

## 1. Mailing & shipping solutions

Our postage meters and office shipping solutions let you create your own mini-post office, sending mail and packages directly from your office or mail centre. Our end-to-end solutions will simplify your everyday office sending, giving you access to postal discounts, increasing productivity, and saving you time and money.

## 2. Other mailing equipment and software

Our solutions can transform your end-to-end mailing workflows, so the right message is delivered to the right recipient, ensuring accuracy, compliance and privacy at all times. Our equipment range includes folders, inserters, openers and finishing solutions. Save yourself from repetitive manual work and put more time into strategic matters.

## 3. Print solutions

Whether you're looking for a compact office printer, an envelope printer, or you need a high-volume print and mail production process, we can help you find the right solution to create engaging, personalised and accurate mail pieces.

## 4. Digital workflows and document management automation

We offer print to mail solutions, so you can automate your printing workflows and manage the distribution of your documents printed or digitally depending on your customer needs and requirements.

We also provide a range of scanners that combine high-quality capture with intelligent software. We can deliver a custom document management solution tailored to your needs using powerful desktop scanners that are best in class.

We can also help you securely collect and process information on any mobile device. Our app-based solution lets you create and download eForms while on the go, making it the ideal field service management solution. On demand digital forms provide mobility and speed up your business processes by making data accessible in real time.

## 5. Security & tracking solutions

### Workplace access management solutions

Pitney Bowes Smart Access Management® or SAM is a digital workplace management system for staff, contractors and visitors. SAM enables contactless and facial recognition sign-in via an easy-to-use system, providing consistently secure, compliant, and welcoming workplaces.

SAM helps organisations comply with workplace health, safety and security requirements, offers real-time visibility of data, and helps to improve security in the new hybrid world of work. It uses intelligent, data-led technology and real-time monitoring to enforce physical and digital workspace access authorisation.

### Shredding solutions

Data and information security has never been more important, and organisations must take steps to reduce the risk of data breaches and security incidents. Investing in a Pitney Bowes shredding solutions can help mitigate these risks. We offer high-quality German engineered shredders which provide reliable document shredding with economic energy management. Our shredders are designed to handle physical and digital data: from paper to CDs/DVDs and USB flash drives.

### Parcel management

Our package receiving and tracking solution SendSuite Tracking (Online) is designed to provide accurate status and chain of custody of all your inbound packages. With a simple scan of a barcode you can track, monitor and deliver both mail and packages with confidence.

We also provide a smart locker, software and service solution for optimal management of deliveries to your offices or facilities. Our custom-built parcel lockers are modular and scalable, delivering safety, security and convenience.

## 6. Other business solutions & office supplies

We provide a range of smart, connected products for the office such as high-performance, medical-grade air purifiers and interactive screens.

You can also easily order all your office supplies on our webstore including: paper; equipment consumables like postage labels or sealing fluid; shipping supplies like boxes, satchels and tape; mailing supplies such as envelopes.

We also stock Pitney Bowes postage meter ink, which fully meets all Australia Post and New Zealand Post requirements. It is specially formulated to safeguard your postal funds by creating a sharp, clear, postal impression, every time. We recommend the use of only genuine Pitney Bowes supply products with our machines to keep your equipment in mint condition.

# Professional services and customer support

Pitney Bowes is committed to delivering world-class products and solutions. As part of this commitment, we provide a comprehensive range of services and support designed to keep your solutions working to their full potential and to ensure maximum business continuity. We offer a series of service contracts that ensure we assist you in all matters related to your solutions.

## Product installation

Our installation services manage your equipment installation processes from start to finish. We set up hardware and software, perform necessary configurations, and train operators to ensure that you optimise your equipment investment. We help minimise equipment start-up time and maximise operating efficiency.

Our commitment to training offers our customers the advantages of unmatched reliability and service. Our nationwide network of highly skilled professionals ensures you always receive the best service possible anywhere in the country.

## Product training

Get the most value from your Pitney Bowes assets through our product operator training programs. Customised, onsite training ensures you maximise the features and functionality of your Pitney Bowes Solutions.

Our experienced professionals deliver hands-on instruction to using your equipment, in your environment. Pitney Bowes Operator Training is personalised to meet the needs of your unique application and provides a cost-effective, proven solution for training new operators or expanding the knowledge of your existing staff. We provide flexible training services including:

- Implementing a new Pitney Bowes product solution.
- Training new operators.
- Refresher training on an existing product.

## Equipment maintenance

Let's face it; keeping your mailstream running smoothly is vital to your business. Any interruption can cost you valuable opportunities and lost productivity. To help ensure your business keeps operating at peak efficiency, count on Pitney Bowes.

Pitney Bowes has three levels of cover ranging from premium to basic, all with guaranteed response times\*. Contact Pitney Bowes to find out which level of service cover is best suited to your specific business needs.

\*Response times calculated on operational business hours.

## Online support

We have a comprehensive support section on our website where you can find product information, troubleshooting videos and more. Check out [pitneybowes.com/au/support](https://pitneybowes.com/au/support) or [pitneybowes.com/nz/support](https://pitneybowes.com/nz/support) for more details.

## Flexible financing options

Pitney Bowes can provide flexible financing options, so you can choose what suits your budget. You can choose for immediate payment to take advantage of e.g. instant tax write-off or opt for incremental payments via leasing direct with Pitney Bowes.

No matter what payment option you choose, we ensure rapid deployment of your technology solution so you can get rapid time to value and return on investment.

# Mailing & shipping solutions

Our postage meters and office shipping solutions let you create your own mini-post office, sending mail and packages directly from your office or mail centre. Our end-to-end solutions will simplify your everyday office sending, giving you access to postal discounts, saving you time and money.

## SendPro C

Businesses need to operate as efficiently as possible. The SendPro C postage meter is reliable and easy to use, allowing you to process mail in record time. You can be confident your business is paying the correct postage every time.

- Process mail at up to 65 letters per minute, print postage quickly, and accurately weigh small parcels.
- Efficiently manage mailings and save on postage from your device.
- User friendly experience thanks to an integrated touch screen.
- Connect using a wired LAN connection or wireless through Wi-Fi.
- Enable accounting functionality to capture cost centre usage.

## DM450/450SL

The DM 450/450SL comes with SmartLink™ technology. This gives you a digital connection to make it easy and convenient to update postal rates, software and graphics. Benefits of your connected DM450/450SL meter include:

- Automatic postal rate updates and software updates.
- Remote diagnostics with support and error troubleshooting notifications.

## DM400

Bring efficiency to your mailroom, with automatic feeding functionality.

- Process up to 95 letters per minute.
- Handles mail pieces up to 8mm thick.
- 5kg integrated scale with the option to upgrade.
- Digital connectivity.

# SendPro™ P Series

## All-in-one mailing system

The SendPro P Series mailing systems simplify processes by integrating mailing and receiving into a single system. The P Series provides a simpler, more streamlined way to send letter mail and large envelopes. With the receiving application, you can accurately log all of your incoming packages and important documents so that you have an accurate history of every item delivered to your office. Quickly improve productivity and cost efficiency.

### Key features:

- Processes stacks of mixed-size mail with correct postage with Weigh-on-the-Way® (WOW®) and Dimensions-on-the-way® (DOW®)\*.
- Complete tasks quickly and accurately with a colour touchscreen and easy-to-follow menus.
- Seal and print postage for your short and longer runs at up to 300 letters per minute.
- Print your business logo, return address or promotional messages on envelopes for a more professional look.

## Product range

Whether your business shares shipping and mailing responsibilities or has dedicated mailroom staff, the SendPro P-series has an office mail system built for your needs.

- SendPro P1000: Designed to save you time and money, this the entry level product in the range.
- SendPro P2000: Built to meet the challenges of high-volume sending, the P2000 can quickly improve productivity and reduce costs.
- SendPro P3000: For high-output mail operations looking to grow their business, the P3000 is our most powerful solution.

SendPro™ P3000

# Folding and inserting

## Relay™ 9000 inserting system

The adaptability of the Relay 9000 makes it ideal for direct mail operations. With the ability to handle up to 3,600 mail pieces per hour, the Relay 9000 can process a variety of envelope sizes. The intuitive insert mechanism allows for a wide range of inserts to be handled. You can opt to add extra feeders and stackers.

- Process up to 3,600 pieces per hour.
- Handles a range of inserts including; CD packs, brochures, and cards.
- Perfect for folding A3.
- Top feed friction allows for accurate separation of documents
- Switch between portrait and landscape feeding depending on your insertion requirements.
- Optional integrity scanning (OMR, 1D and 2D barcodes)

## Relay 8000 inserting system

Get the peace of mind knowing your mail is completed accurately on a reliable system with the Relay 8000 inserting system.

- Automatic setup for up to 24 stored jobs.
- High capacity sheet feeders and envelope feeder reduce reloading requirements.
- Electronic 'smart nip' folder allows fold settings to be changed instantaneously within jobs to handle a wider range of inserts.
- Optional FastPac envelope conveyor.
- Features OMR, with optional 1D, 2D, exit scanning and file based processing integrity.
- Process up to 5,400 pieces per hour or 200,000 pieces per month.

## Relay 7000 inserting system

The Relay 7000 allows you to stay productive, while delivering world-class accuracy and privacy for your mail. Process letter and flat envelopes in the same job.

- Process up to 5,400 pieces per hour or 120,000 pieces per month.
- Flexible tower feeders allow a wide range of sheets and inserts.
- Ideal for short runs and reprints in the production mail environment.

### Relay 6000 inserting system

Improve productivity with the Relay 6000, which enables you to assemble up to 4,300 mail pieces per hour. Experience the benefit of enhanced speed and accuracy for all your various mailing jobs.

- Process up to 4,300 pieces per hour or 120,000 pieces per month.
- Small footprint.
- Optional high capacity sheet feeder allows for a total of 2,000 sheets per feeder.
- Security of 1D or OMR with optional 2D barcodes and filebased processing.

### Relay 5000 inserting system

Ideal for mid-volume mailers, the Relay 5000 inserter uses the same reliable design of our flagship table-top inserter, while maintaining a small footprint.

- Envelope feeder holds up to an impressive 350 inserts.
- Process up to 4,000 pieces per hour or 62,500 pieces per month.
- Security of 1D or OMR with optional 2D barcodes.
- Optional high capacity sheet feeder allows for a total of 2,000 sheets per feeder.

### Relay 4500 inserting system

The Relay 4500 is a fast and accurate folding and inserting system with a simple user interface. Featuring optional OMR, 2D barcode scanning technology to automatically fold, insert, and seal your variable page mail.

- Touch screen interface provides visual and text based prompts to guide job set-up.
- Security of optional 2D barcodes or OMR.
- Folds and inserts up to 3,500 pieces of mail an hour.
- High capacity feed trays.
- Fold and inserts up to 3,500 pieces of mail per hour.

### Relay 3500 inserting system

Reliability and productivity delivers in an easy-to-use folder inserter machine. The Relay 3500 allows you to automatically handle variable page mail and ensure your customers' private information makes it into the envelope accurately.

- Touch screen interface provides visual and text based prompts to guide job set-up.
- Folds and inserts up to 3,000 pieces of mail an hour.
- Operator friendly controls let you load and run up to 20 pre-programmed jobs.
- Security of optional 2D barcodes or OMR.

### Relay 2500 inserting system

The Relay 2500 gives you a fast and easy way to fold, insert and seal your mail. It's 2D barcode and OMR scanning feature eliminates the need to sort variable page documents by hand.

- A smart solution for bills or statements, direct mail, inserts and reply envelopes.
- Process up to 2,500 pieces per hour.
- Process up to five pages stapled or unstapled.
- Optional integrity feature, 2D barcode and OMR.

## Relay 1000 inserting system

The Relay 1000 is the simple solution for automating your everyday mailing like invoices, cheques, newsletters or direct mail. Self-installable, compact and quiet, making it a smart addition to any work environment.

- Folds A4 sheets to various fold options.
- Fold, insert and seal up to 900 mail pieces per hour.
- Operational efficiency. Save time and money.
- Optional second sheet feeder, adds scale to your operation.
- Include inserts with your folded document.
- Fold stapled sheets.

Image shown with optional second sheet feeder.

## DF900

The DF900 Folder is a fully automatic folder that has been developed to eliminate your manual folding difficulties. It will improve the accuracy of fold and therefore final presentation of your mail and hand bills.

- Seven fold options.
- Folds up to 20,000 items per hour.
- Fold A3 into A4.
- Easy to use LCD panel control.
- Handles up to 200 gsm in weight.
- Optional cross-folding kit for creation of larger complex brochures and newsletters.
- Full setup, with the ability to store frequently used settings.
- Manual feed for pre-collated and stapled documents.
- 20 savable job presents.

## DF800

Sleek, modern and quiet, the DF800 automates your manual folding processes. It will improve your fold accuracy considerably, making your mail look more professional.

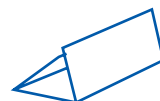

- Seven fold options.
- Folds up to 13,000 items per hour.
- Easy to use with LCD panel control.
- 20 savable job presents.

# Digital workflows & document automation

## Kodak® Scanners

Kick-start your digital transformation journey and remove compliance risks of paper records with our range of Kodak scanners to manage, maintain and store sensitive information.

### 730EX Plus

Reduce processes and scan directly to your network without the need for a PC. Scans up to 70 pages per minute.

### Alaris S2000 Series

Speed up and simplify your processes. Capture information anywhere, with superior image quality and data accuracy.

### S3000 Series

A powerful, connected solution that meets your needs as you grow. Scans up to 120 pages per minute.

### i4000 Series

Exclusive paper feeding technology captures virtually any document in almost any condition for unbeatable reliability. Scans up to 150 pages per minute.

# Transform cluttered data into useful intel

## Printstream management PlanetPress®

PlanetPress allows you to automate your printing workflow and manage the distribution of your documents based upon your existing business processes—how you want it, when you want it.

By using input from any host system or application, the workflow tools process the documents, following user-friendly rules and conditions. Flexible document editing allows you to split or merge existing files, sort them, enhance the existing layout with barcodes, OMR marks, signature capture zones or targeted messages; all automated, with little human intervention.

PlanetPress then outputs the documents to any printer, locally or remotely, or creates electronic versions of the documents to distribute them using the recipients' preferences, whether by fax, email or regular mail. PlanetPress can automatically create an electronic archive for you to store in your document management system—with an index for easy retrieval.

## Upflow: Document and Workflow Automation for Accounts Payable

Upflow's FileBound automation capabilities help AP departments of all sizes increase productivity, shorten cycle times, reduce overhead costs, improve visibility and comply with financial standards and audits.

- Streamline your Accounts Payable department to run smoother with higher transparency and better results.
- Keep sensitive HR records safe, secure and available.
- Implement governance over critical legal contracts, including creation, authorisation and life-cycle management. Improve your Accounts Receivable KPI's without adding staff.
- Automate and streamline key staff processes such as performance management, leave application and professional development requests.
- Reduce your use of expensive couriers to send physical documents.
- Put an end to the trauma of "lost documents" and wasted time completing futile searches. FileBound's Document Management software ensures your digital transformation project has the right foundation for success.
- Make your content available wherever you are, whenever you need it and on the device of your choice.

Branding your company with unique print and delivering document integrity are significant milestones for achieving stand-out customer communications.

## Data quality

**Data is the first step to knowledge**

Ensuring your data is clean and verified is crucial to using your data effectively. How do we do this? Authenticating your data against authoritative and reliable sources; enhancing your data to build and deliver intelligence; and finally outputting your data, so it's meaningful and actionable.

By applying proven data quality processes to your operations, all via a single cloud-based platform, you are truly empowering your business.

## Virtual stationery

**Capture On-The-GO™**

Capture On-The-Go is designed to replace paper forms with unique e-form technology. Quite simply, data or documents can be sent to PlanetPress and then compiled as pre-populated forms. Based on specific business rules the forms are then distributed to each account automatically.

With advanced capture features such as camera functionality, drop down menus, GPS locality and signature fields the data is captured, and sent back to PlanetPress for processing. The captured data can be pushed back into other systems, archived, emailed or even used to trigger other workflows to automate business processes.

Significantly reduce errors and processing time and increase efficiency by automating business processes. Capture-on-the-go is supported on iOS and Android.

# RISO ComColor® Inkjet Printers

## RISO ComColor® Inkjet Printers

Accelerate your print and mail process with dependable high-speed inkjet printing. Mailing important customer communications should not be delayed by printer downtime or waiting for paper to cool. That's why Pitney Bowes partners with RISO to bring you ComColor FT and GL inkjet printers. These world-class solutions improve the productivity of your print while also making your end-to-end mailing process faster and more efficient. There are two models available:

## FT Inkjet Series

Prevent paper curl and reduce paper jams typically experienced from traditional toner-based printers. The FT series enables ultra-fast print speeds up to 140 pages per minute for simplex and duplex printing to boost productivity.

## FS2000C Fiery® RIP

The FS2000C Fiery RIP server is an optional interface that enables local and remote Mac or PC users to manage the FS2000C, perform color management, submit jobs, prepare and preview jobs before printing, and more.

## GL Inkjet Series

The GL series enables ultra-fast print speeds up to 165 per minutes. Print your documents reliably using heatless inkjet printing, so you can fold and insert mail without delays. Combined with a new Fiery® RIP, improves the productivity of your print, while making your end-to-end mailing process faster and more efficient.

## High Capacity Feeder

Achieve a higher volume of prints without replenishing paper with the optional High Capacity Feeder, built to hold up to 4,000 sheets.

## High Capacity Stacker

The optional High Capacity Stacker allows the stacking of larger output volumes with reduced user intervention. Convenient removal and transport of the printed output is possible using the optional High Capacity Stacker Cart.

# Envelope Printers

## OKI Envelope Printer

The OKI Pro 9431 DP+ Envelope Printer delivers vibrant, high quality output on a wide variety of media and substrates. Straight through print path supports a variety of media types. Expansion trays also allows for document printing. Expand your business with short-run colour production envelope printing.

- Easy to use
- Improved window envelope support
- Print up to 500 DL envelopes in under 12 minutes
- Get short-run production savings

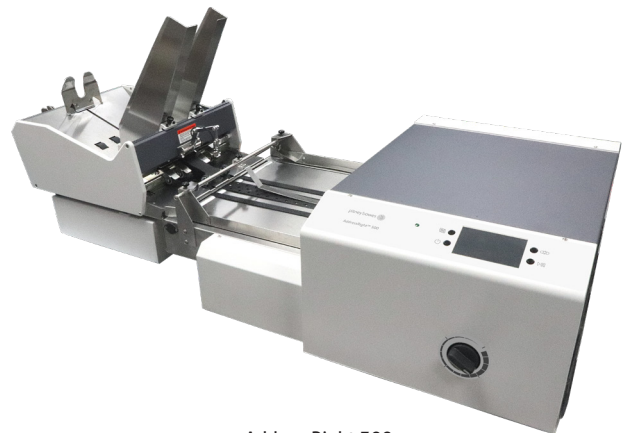

OKI Pro 9431

## AddressRight® Envelope Printers

Rely on the AddressRight envelope printer series to provide you with the speed and efficiency that drives your profitability. Create personalised messages for specific segments for maximum impact and response rates. All printers let you apply identification barcodes with ease. Our range includes AddressRight 100-200-300 printers.

- Fixed-head inkjet printing to quickly address and personalise mail at speeds up to 30,000 mail pieces per hour.
- Print directly on envelopes postcards and other media.
- Add personalised messages on the outside of your mail to increase open and response rates.
- Update and eliminate old addresses, to avoid delays in delivery and returned mail with our optional software.

AddressRight 300

## AstroJet S1

The AstroJet S1 is a versatile and easy-to-use colour printer with 'Memjet waterfall' technology. Thanks to the adjustable printhead, the applications and possibilities with this printer are endless. The AstroJet S1 offers smear-free printing on envelopes or other media, including cardboard and padded envelopes. Easily monitor printer status, ink levels, job status and more at a glance via the 7" touchscreen display. The touchscreen buttons control often-used printer functions. Other features include:

- Excellent Print quality – up to 1600 dpi in full process colour
- Speed – Print speeds up to 60' per minute
- Cost-efficient - Low cost-per-copy
- Adjustable media control – Wide variety of media up to 10" wide and 0,4" thick

AstroJet S1

# Letter Openers

## Omaton 306

High volume, high speed envelope opening with breakthrough speeds of up to 40,000 envelopes per hour.

- Opens up to 660 letters per minute.
- Flexible and easy job setup.
- Superior milling technology with 8 cut depths to protect your contents from damage.
- Optional sorting, batching, printing and reporting functions to enhance your downstream processes.
- Convenient count function.

Omaton 306. Picture shows optional conveyor stacker.

## Omaton Series 210 and Series 410

Fast and simple inbound mail automation with performance and features found in high-end envelope openers. Automatically open up to 400 envelopes a minute with mixed mail thicknesses and sizes to be fully opened edge to edge.

- Handles wide variety of mail sizes and thickness including overnight envelopes.
- Advanced milling technology opens mail completely, edge to edge.
- Series 410 can print date, time, and sequence number for traceable mail.

Omaton Series 210

## 1241

This robust yet compact machine automatically opens letters at impressive speeds. Regardless of the format, each letter is opened accurately, with no damage to the contents.

- Handles envelopes up to 260 x 330mm.
- Envelopes are slit open meaning no waste product or bins to empty.
- Adjustable cut depth.
- Automatically open up to 400 letters per minute.

1241

## DL75

Save your business time and money.

The DL75 Letter Opener has the ability to automatically open up to 300 letters per minute. It can handle a wide range of envelope types, up to and including B4 Size, 250mm x 353mm and will accept envelopes with a thickness of up to 4mm.

DL75

# Inbound parcel and asset tracking

We handle billions of parcels, packages and pieces of mail per year, helping businesses manage costs and streamline operations in all of their mailing processes. From rate selection to tracking, we also enable efficiency across a range of shipping scenarios.

## SendSuite™ Tracking

### Enterprise inbound parcel tracking and management

Managing the distribution of important items such as special or recorded delivery mail or courier packages is a difficult task.

SendSuite™ Tracking helps businesses take control of the receipt, transfer and delivery of incoming mail and assets.

Backed by sophisticated reporting, it puts you in control by providing you with the tools to know the real time status of any item—who had it previously, who has it now, when they took receipt and where the item is located.

## SendSuite™ Tracking Online

### Say goodbye to lost or misplaced packages and say hello to SendSuite Tracking Online

SendSuite Tracking Online is a SaaS based solution, automating the process of logging, tracking and managing important packages and mail coming into your organisation.

Choose the SendSuite Tracking Online subscription package and hardware that's right for your business needs.

*We previously used a manual process for incoming mail and packages. However, because of the large number of couriers we receive daily this took up a lot of time for our admin staff. At the same time, having a manual process left room for errors. We decided to invest in SendSuite Tracking Online to automate the process and increase the productivity of our reception staff. Implementing SSTO has made a great difference to our business, particularly for our admin team.*

*We've managed to reduce the time spent on inbound parcel management by two hours each day, which is an incredible time saving. Furthermore, we've reduced the errors in delivering packages and documents around the business, which has led to happy personnel.*

— Stephanie Utanga,  
Campus Facilities Manager,  
Fletcher Building.

#### Experience the convenience of our cloud-based solution

Eliminate IT costs and delays. Automatically receive new features as soon as they are released.

#### No training required

Easy for anyone to use. Within 10 minutes of receiving your welcome email, you will be proficient and productive.

#### One 2D scan tracks your package across its journey

Operators deliver each item to a nominated checkpoint or to the intended destination.

#### Receive email notifications

Reduce "where's my package?" You can send email notifications to internal recipients once a package has been scanned.

# Smart Lockers

Smart Lockers are revolutionising the way consumers and businesses receive and distribute their deliveries. Pitney Bowes provides a software, lockers, database and service solution for optimal management of deliveries, so your building can maintain a high-end look and increase efficiency. Our custom-built lockers are modular and scalable, delivering safety, security and convenience to your building.

## Discover hassle-free parcel deliveries

Your staff or couriers from any company make contactless deliveries directly into your lockers.

Collections and deliveries are recorded to monitor and register accountabilities, thus mitigating risk.

Recipient automatically receives a secure access code and can collect the parcel at their convenience 24/7.

Lockers are modular and customisable, with the option to increase bank size at any time as your demand grows.

# Secure document destruction

Transactional, proprietary and sensitive documents must be disposed of properly.

Our range of shredders can handle a wide range of materials.

Our German engineered HSM shredders provide outstanding secure destruction for paper and digital media. Whether it is for the home office, or major corporate departments, we have the perfect solution.

- High quality made German shredders.
- Fast, quiet and powerful.
- Low power consumption.
- Reliably shred CD's/DVD's and credit/store cards.
- All security classes from standard office to high security level 6 "COMSEC".

HSM shredders provide a secure, onsite destruction of confidential information and data. Making it suitable for any office environment including small and medium businesses, large enterprises, and both central and local government.

**Security level 2 strips**  
Shredding no. 5  
5.8 mm

**HS level 6 particles**  
1 x 5 mm

**Energy management control system**

**Shred credit cards, store cards and CDs**

**Shred USB sticks**

**PAPERcontrol function helps reduce paper jams**

# Workplace Access Management

Pitney Bowes Smart Access Management® or SAM is a digital workplace management system for staff, contractor and visitor access. SAM enables contactless sign-in via an easy-to-use system, providing consistently secure, compliant, and welcoming workplaces.

SAM uses intelligent, data-led technology and real-time monitoring to enforce physical and digital workspace access authorisation. The system effortlessly supports HR, IT and facility managers in protecting their organisation's people, premises, and reputation. SAM lets you create custom workflows, to design a process for each type of visitor to your sites. You can customise the user experience including interface graphics, branding, registration fields, health and safety messaging, and your visitors' ID labels. On the admin side, the system's ongoing service agreement guarantees any issues are quickly resolved.

## Premium Kiosks & Devices

Robust kiosks & desktop devices to accelerate check-in with or without staff at reception.

## Visitor Management System

Manage multiple sites from a centralised online portal for residents, staff and visitors.

## Monitoring & Reporting

Access critical information with emergency printouts or remotely via online dashboard.

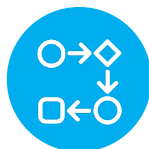

## Customisable Content

Customise the user experience, including branding, registration fields and health & safety messaging.

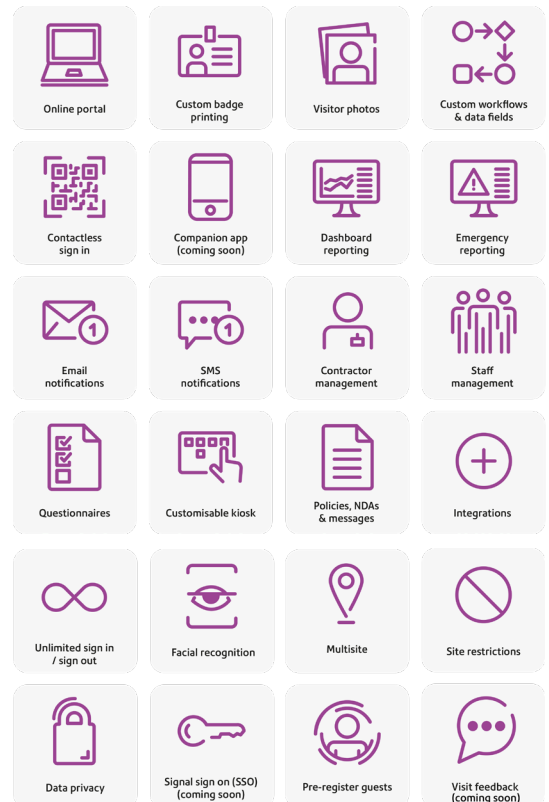

## Facial Recognition

Benefit from a quick & efficient verification system enabling a no-touch way to sign-in & sign-out.

## Unlimited Workflows

Create custom workflows with self-setup & design a bespoke process for each visitor type.

# Smart Business Solutions

## Air purifiers

Clean air has become a valuable commodity in the modern world. Air purifiers are essential tools to help reduce the risk of contagions in the workplace, remove airborne viruses, bacteria, and other pollutants to help maintain employee health and safety onsite. The Air Purifier Series is our superior-grade air purifying technology delivering cleaner air for your work environment.

### Discover the range:

- The AP 1500 is perfect for larger offices and workspaces.
- The AP 800 is a medium sized air purifier, ideal for your office or classroom.
- The AP 400 is a compact air purifier – perfect for small office use.

### Key features of our Air Purifiers:

- Pre-filters: catch and trap larger and airborne particles. Easy to disassemble and clean.
- HEPA filters: catch and trap bacteria, viruses, and smaller airborne particles and pollutants.
- >99.97% PM2.5 removal rate.
- Activated carbon filters: efficiently and lastingly absorb harmful gases such as formaldehyde, toluene, odour, and more.
- WiFi controlled through support mobile app.
- Sterilisation principles: Antibacterial filter, UVC light, Photocatalyst, Anion.
- Child lock.
- Automatic mode.

## Newline Q Series: High Performance Interactive Display Solution for Everyone

The Newline Q Series is a more powerful, secure and future-proof smart interactive solution. Extensive connectivity, amazing ease of use, and paper like writing technology allows users to stay fully focused on teaching.

---

## Committed to the Australian and New Zealand market

For over 100 years, Pitney Bowes has crafted commerce solutions to help businesses of all sizes excel. Every day, we work to earn our clients' support by doing the right thing, the right way.

As a global technology company, our purpose-built products and services help power organisations worldwide.

We have been in the Australia and New Zealand markets for 40 years and we're committed to supporting your business for the long run.

We operate with integrity, providing you with reliability and certainty that you get the best-quality mailing equipment, local service and support.

We're a trusted advisor to more than 750,000 customers around the world who rely on our equipment to keep their business running and growing.

To review our full portfolio of products and solutions, visit our website [pitneybowes.com/au](https://pitneybowes.com/au).

## Diversity and inclusion

At Pitney Bowes people matter. We celebrate the diversity of our more than 11,000 employees worldwide and work to create an inclusive environment where all belong and have opportunities to grow and make a difference. Pitney Bowes' record of advocacy and commitment to diversity and inclusion has been externally recognised with numerous awards throughout the years.

## Creating meaningful impact

We are dedicated to being a positive force for change and strengthening the well-being of our communities. This commitment is part of our core values and is embraced and supported by our employees across the globe.

## Commitment to building a sustainable future

Pitney Bowes has a long tradition of environmental responsibility, and we continuously look for ways to further reduce our environmental footprint.

Over the past 50 years we have worked on various key projects such as to minimise our waste streams, expand the use of returnable/ reusable packaging, maximise the use of water-based inks, improve the recovery of equipment for reuse, recycling and end-of-life stewardship, and manage the remediation efforts from legacy site contamination.

## Committed to continuous innovation

Our focus is and always has been on innovation. From the first postage meters to today's software and services, we craft technology solutions that remove complexity and drive meaningful impact for your business.
