Postage Meters

SendPro™ P1000

# Take control of everyday challenges.

## Integrate your sending processes.

Sending daily letter mail and receiving packages are a necessary part of doing business. Yet, these seemingly simple tasks that demand proper attention.

The SendPro P1000 simplifies the process by integrating mailing and receiving into a single processing system. With this combination, the P1000 provides a simpler, more streamlined way to send letter mail, large envelopes and ship satchels or parcels. With the receiving application, you can also accurately log all of your incoming packages and important documents so that you have an accurate history of every item that has been delivered to your office.

With sending costs rising and becoming more complex, the SendPro P1000 can also quickly improve productivity and cost efficiency in your office.

## Mail with ease.

For letter mail, the SendPro P1000 will seal and print postage for your short and longer runs at up to 180 letters per minute. It handles thin or thick mail as well as small or large envelopes. The SendPro P1000 mailing system guides your operators with its easy-to-follow menu on the colour touch screen, so that anyone in your organisation can operate it. And with the flexible printing features, you can choose what colour to print a return address, business logo or promotional message on your envelopes and packages eliminating the costly expenses of pre-printed envelopes or con notes and special order printing.

For more information, call or visit us online.

## Intuitive user display

The modern, colour touch screen display of the P1000 enables anyone in your office to pick the ideal service and complete each job quickly and accurately. The system guides the user with its easy-to-follow menus for receiving packages and sending mail or parcels.

## Flexible printing

The P1000 also gives you unique control over envelope printing. From any desktop PC, you can upload your graphics, enabling the P1000 to print a business logo, return address, or promotional message in full colour on outbound envelopes. Print just one or print a thousand. The savings add up. Its quick changeover gives you printing flexibility and can eliminate the premiums you pay for last minute changes and special envelope stock.

## Manage inbound deliveries.

Automate and streamline the receipt and management of incoming items using your P1000 and its integrated barcode scanner. The P1000 instantly logs package information, including logs package information, including carrier, recipient, sender, tracking number and date and time of receipt, keeping a history report of all your incoming packages. You will then know when each and every package was delivered.

## Specifications
