

pitney bowes  Digital Invoice  
Processing

# Pain-free Digital Invoice Processing.

100% managed. 100% accurate.

# Digital Invoice Processing that feels simply *Ahhh-mazing*.

Your finance department is a critical business function that your entire company relies on. Too often though they're bogged down with painful manual data entry, complex invoice processing and time consuming corrections, orchestration and validation of invoices.

But with Pitney Bowes' Digital Invoice Processing platform, your finance teams can go from this state of *Argh* to feeling blissfully *Ahhh*. Our fully automated solution

brings the accuracy, insight and power to put them (and you) in total control, with automated data extraction that is 100% accurate – every time.

So your teams can handle any type of invoice format, from HTML to PDF, our solution can do it all. Pick up errors, automatically populate data and unlock the awesome power of full invoice data for your entire business so you can easily share reporting and analytics with everyone.

We'll free up your finance teams, automating all your digital processing so they can get on with what matters. And you can cut out paper altogether to become leaner and greener than ever.

We manage the technology on your behalf 24/7 too, and take full responsibility for the accuracy of processed data so that you get complete assurance. Welcome to a whole new way to manage digital invoicing. One that feels *Ahhh-mazing*.

# Ahhh. Now that's more like it.

Imagine digital invoice processing felt this good. With our fully automated Digital Invoice Processing solution it can. Get total control, empower your teams and become faster and more agile than ever.

## Putting you in total control

We bring a fully managed service for absolute simplicity and security putting you in control. With complete visibility of your invoice processing you'll have total assurance too. And our platform works seamlessly with your existing tech to deliver 100% accuracy.

## Become faster and more agile

Get rapid, automated digital invoice processing and error identification to make real-time transactions and invoicing possible. Become faster and more agile while building better supplier relationships built around complete transparency.

## Empowered by data

Unfortunately for many businesses, access to highly valuable data has long gone untapped due to tech constraints and manual processes. But with Pitney Bowes' Digital Invoice Processing platform you can extract ALL the data you need from every invoice. And run reports in real-time.

## Free up valuable finance resource

With Pitney Bowes' Digital Invoice Processing, you get intelligent automation to drive increased efficiency and speed. Free up your finance teams from repetitive manual tasks so they can focus more on the things that matter.

# Go from *Argh* to *Ahhh* in 4 simple steps.

Our fully automated, managed cloud service solution makes invoice processing easy.

## 1. We work closely with you

To design a solution and a proposal that works for your business. So we that you can overcome your biggest challenges.

## 3. Building for success

Once we understand exactly what your finance team needs, we'll build the data acquisition and processing rules around your requirements. Any reasonable changes are free of charge.

## 2. Understanding your unique needs

Then we'll create a Project Initiation Document that gives you the information you need to take your project live. From data extraction to output type and data security requirements. We've got you covered.

## 4. Delivery

We'll even help you launch the new system and get your suppliers onboarded as quickly as possible. Your suppliers continue to send their invoices as normal and we can support efforts to encourage them to swap paper to PDFs.

# Putting you in total control

**We process your digital invoices with 100% accuracy and our smart technology identifies errors with complete precision.**

By lowering the impact on your internal IT resources, as well as alleviating the burden on your finance teams, we help put you in total control. Our open API interface works seamlessly with your existing tech for greater flexibility and brings powerful fraud prevention capabilities to protect you and your business.

With our fully managed, completely automated solution you get:

**Consistent 100% accuracy**

**Automatic error correction**

**Open API that works seamlessly with existing workflows and processes**

# Empowered by data

Our digital invoice processing solution lets you tap into a goldmine of data previously unreachable due to technology constraints and manual processes. We can help you leverage this valuable data with its direct access to spend and financial information. The Pitney Bowes Digital Invoice Processing Platform extracts all invoice data and makes it immediately available to your entire business for more in-depth analytics, insights, delivery information and more.

We make it simple to ensure invoice data is actionable based on customer requirements and we bring a deeper level of visibility to help you better identify trends and opportunities which may impact procurement negotiation.

**Build trust with 1000+ pages and line items extracted and validated in hours**

**Empower your decision-makers with fully accurate invoice data which can be downloaded in minutes for detailed analysis**

**Extract data from any kind of inbound invoice type including PDF, scanned images, XML, EDI and HTML**

# Free up valuable finance resource

Free your finance teams from repetitive manual tasks and enable them to work on what matters most and deliver greater value for your business. Create time and space to increase innovative capabilities and improve the employee experience of some of your most valuable people.

Handle peaks and business growth without the need to hire more invoice processing staff and completely eliminate time wasted tracking down and addressing exceptions and errors.

**Empower your finance teams**

**Enhance innovative capabilities**

**Better manage peaks and workloads and completely remove manual data entry**

## Become faster and more agile

With our intelligent, fully managed solution, you can process digital invoices faster than ever before, identifying and correcting errors and enabling real-time transactions. Build better supplier relationships through enhanced transparency and ensure quicker reconciliation to reduce cycle times and costs.

Automated delivery ensures greater efficiency and agility in today's more connected, digitally-driven world while we can enable seamless interfacing with all ERP's and any existing workflow tool for greater flexibility.

**Increase speed,  
agility and efficiency**

**Build better supplier  
relationships**

**Extract everything at line  
level, from PO numbers,  
dates, references, VAT  
numbers and even  
contact numbers**

# Why choose Pitney Bowes?

We have deep industry expertise in digitizing complex business processes as well as over 100 years of experience in physical invoicing. So we bring the best of both worlds to help you transition to digital invoicing simply, safely and securely. We understand your key transformation challenges better than anyone else and we're trusted by big global businesses around the world because our proven track record is unmatched. We bring:

## The latest technology

Our cutting-edge technology means we can deliver truly pain-free digital invoicing to give finance teams more freedom and deliver greater precision, agility and resilience to drive businesses forward. We use analytical capture programming language to intelligently extract everything at line level, from PO numbers, dates, references, VAT numbers and even contact numbers so your finance teams have all the data they need.

## Exceptional accuracy

We make digital invoicing fast and secure, and no one offers greater precision than us. We deliver reliable 100% accuracy when extracting information from formats including PDF, scanned images, XML, EDI and HTML. Our service is cloud-based too so we deliver updates as soon as they're required, ensuring full compliance without the need for costly hardware overhauls.

## Total support

With skilled technical resources, we reduce the complexity of making the leap to digital invoicing and we manage the technology for you. We also offer a full spectrum of cost-effective solutions and services to help with mailing and document sending and receiving, including hybrid mail solutions, multi-channel mail creation, electronic document management, digital payslips, archiving capabilities and electronic signatures.

**At Pitney Bowes, we're a proven leader in physical and digital invoice processing.  
See how easy we can make your shift to digital invoice processing today.**

# We understand your challenges, and we know how to overcome them

## With our Digital Invoice Processing Solution you can:

Handle any kind of inbound invoice type including PDF, scanned images, XML, EDI and HTML. So your suppliers can continue to send their invoices to you in the same way they always have. We also handle the automatic collection of these documents and their conversion to a digital format.

Strip out all the information your system needs including PO numbers, dates, references, VAT numbers and contact numbers. We can even extract this information from the email the invoice is attached to and automatically upload it to any finance application you use.

Completely remove manual entry, printing and correcting of invoice information. Our intelligent solution automatically picks up errors and we can accept or reject invoices on your behalf. So you only get the highest value, more accurate data possible.

Evolve past Optical Character Recognition (OCR) limitations to be able to maximise the advantages of 100% accurate data extraction – every time, guaranteed.
