

Advanced Productivity Inputs™ High Speed Sheet Feeder (API-36S)

The API-36S is a member of the Pitney Bowes' new Advanced Productivity Inputs family of modular, cut sheet and continuous feed systems.

This new high-speed sheet feeder allows high page count document sets to be scanned, collated and inserted whilst maintaining the high cycling speed of the latest Pitney Bowes inserter chassis ranges.

Control is by means of Pitney Bowes Direct Connect™ software suite, which enables the widest range of functionality, document integrity and productivity.

API-36S

- The API-36S Sheet Feeder will process up to 33,000 A4 sheets / hour in either portrait or landscape orientation.
- The feeder's buffer contains up to 4,500 pages and may be re-loaded whilst the unit is in operation, ensuring uninterrupted operation.
- All standard code types, OMR / BCR / 2D / OCR and Codelite may be read from the documents, enabling collation either by direct scan control or File Based Processing.
- The printed control code may be trimmed off and removed by means of a vacuum trim removal device to ensure a clean look to the final documents.
- The API-36S must be interfaced to members of the new Advanced Productivity Module range of components to construct a complete API Input System.
- API Systems may be mounted on most Pitney Bowes inserting platforms.

High Speed Sheet Feeder (API-36S) Specification Sheet

■ Maximum Cycling Speed	33,000 pages / hr A4
■ Paper Sizes	
Minimum	178mm W x 178mm H
Maximum	305mm W x 355mm H
Paper Orientation	Landscape or Portrait
Paper Weight	75 - 105 gm-2
■ Operational Features	
Paper Separation	Friction with patented separator mechanism
Double Detection	Yes
Page Accumulation	Dual Deck Accumulator
■ Electrical Power Supply	220V 1Ph 50 Hz 20A supplied via inserter chassis
■ Document Scanning	BCR/OMR OCR/2D/Codelite as special options
Code Removal	Trim knife with vacuum trim removal as a special option
■ Operating System	Direct Connect only
■ Configuration	With API modules to the full line of Pitney Bowes 8/9 Series, Comet, FX Series and APS Series inserters.

*Specifications are subject to change without notice.
Performance may vary depending on exact job configuration and environmental conditions.*
