Now you can focus on what's important —your business

Rival™ Productivity Series inserting system

Performance without compromise

In today's economy, mail operations need to make smart investment decisions to cost-effectively meet today's needs and plan for future growth. When making these decisions, it is important that you don't compromise on reliability, accuracy, flexibility and support.

With the new Pitney Bowes Rival™ Productivity Series Inserting System you do not have to settle. The Rival delivers high performance capabilities in a small footprint design to help you deliver customer communications each and every day. Built on the proven Productivity Series inserting platform, this mid-range mail finishing solution provides unparalleled reliability, accuracy and flexibility in an easy to use platform.

Dependable, accurate results

The Rival Productivity Series Inserting System maintains the highest levels of performance during peak processing periods with a robust design based on a proven high volume platform. With the high integrity operating system, each and every mailpiece is tracked for accurate processing to keep your mail operation running smoothly.

Compact and cost effective

With a small footprint and ergonomic design, the Rival system delivers more high value capabilities per square foot.

Simple, easy production

Spend less time on setup and achieve consistent, accurate results with new automated setup features. With the new Automated Fold capability, fold settings can now be included for each job, ensuring easy setup and quality results for each mailing. Save valuable production time with the intuitive user interface that also enables easy identification and fast resolution of system alerts.

Built for flexibility

With a modular, scalable platform, the Rival can be configured to meet your mail processing requirements. Consolidate systems, increase your production capacity and keep your mail in-house with the ability to process a wide array of DL and C4 applications on the same system. The new vacuum based input document feeder precisely handles high value statements with the flexibility to support varying material substrates.

Pitney Bowes

Rival™ Productivity Series inserting system

| Features and options	High value benefits
DL and C4 processing	Consolidate systems, increase production capacity and expand services with flexible platform capable of processing a wide array of applications on the same system
Automated fold capability	Reduce job setup time, ensure consistent, accurate folds; reduce waste (optional)
10,000 or 12,000 cycles per hour	Two speed options to meet SLA requirements; field upgradeable to 12,000 cph
Rival operating system (Direct Connect)	Verifies accurate mailpiece assembly, tracking and delivery
30K Vacuum sheet feeder	Continuous loading, vacuum based feeder maximises productivity for variable page statements; supports various material substrates and print technologies; extended capacity options available
Integrity scanning	Optical Mark Recognition and Barcode Scanning (standard); 2D, OCR (optional)
Resettable meter	Maintain high productivity for mixed weight mail with dual print heads ensuring non-stop printing
Compact footprint and ergonomic design	Maximise value per square foot; high volume features maximise operational efficiency
Scalable Platform	Configurable to meet current operational needs; modular design protects investment and enables future upgrades
Reporting	Productivity metrics and mail run audit keeps operation running smoothly
Flexible service options	Maintain peak performance with a variety of flexible service options, including on-site service, on-call service and personalised service support

System specifications

Mailpiece size:	DL and C4
Length:	171mm x 330mm
Depth:	101mm x 254mm
Document length:	178mm x 356mm
Document width:	178mm x 305mm
Fold types:	C,Z, Half, Double, No Fold
Speed:	Up to 10,000 env/hour; 12,000 env/hour (optional) Up to 30,000 sheets/hour
Scanning:	OMR, Barcode, 2D, OCR

Size: 4.2m x 2.7m
(Based on depicted 3 station configuration; Request detailed drawing of your personalised configuration)

Continuous loading, high capacity feeders maximise operational efficiency

Minimise stoppages with soft start up

DL and C4 capable platform

Verify mailpiece assembled correctly with high integrity operating system

PitneyBowes

Pitney Bowes certifies that the Rival™ Productivity Series complies with the requirements of the Low Voltage Directive 73/23/EEC and the EMC Directive 89/336/EEC.
