

Connect+™ 1000 & 2000

Print as you frank in high resolution colour

The monthly demands of sending out bills, statements, customer notifications and the like are a necessary part of doing business.

Now you can reap the rewards of turning your monthly transactional mail into promotional or revenue generating mail. The new Connect+™ 1000 and Connect+™ 2000 mailing systems can help any organisation turn its regular mailings into revenue generation tools.

Achieve your objectives

The Connect+™ 1000 and 2000 are the first mailing systems that can print targeted marketing or sales messages across the full width of your envelope.

Engage your readers even before they open the envelope with graphics and promotional messaging. Import attention grabbing graphics, logos, return addresses and achieve your mailing objectives.

Full colour printing

Print colour graphics, logos and messages onto your envelopes at up to 1200 dpi to improve your return rates. Reduce envelope printing costs and make savings by keeping pre-printed envelope stocks to a minimum.

Colour touch screen display

An easy-to-use, 10.2" colour display is the hub of your system. You can opt for a 15" screen, making it even easier to navigate your Connect+™ menus and access the suite of applications that support your mail processing.

Applications for improved productivity

The Connect+™ offers a suite of applications that allows you to benefit from even more value from your mailing system:

Connect with PB – log a service request from your mailing machine or chat to a Pitney Bowes operator using our e-chat function.

Buy Supplies – when your machine shows that it is low on ink, order replacement supplies directly from your mailing system.

Royal Mail – locate an address or postcode prior to mailing. Register your mailing through Royal Mail's Online Business Account.

Apps – source new or cleanse existing data to ensure accurate and effective mailing campaigns.

Parcels – track the status of a shipment from your Connect+™ terminal. Send a new parcel using the cheapest possible tariff.

News – keep up to date with the latest industry events and market developments. Receive special offers unique to Connect+™ customers.

Dimensions-on-the-Way™

Connect+™ 2000 uses Pitney Bowes unique Dimensions-on-the-Way™ (D-o-W™) rating technology. The unit automatically rates mail according to size and weight to enhance your mailing process.

Power stacker

The optional power stacker gives you the flexibility to process high volumes of mail, while keeping them all in presorted order.

Monitor Expenditure

The integrated accounting allows you to monitor your expenditure by postal class, format and weight for each of your accounts. Plan effectively by using the optional budgeting module and turn your mail room into a profit centre by adding surcharges to recover your operating costs.

Manage your account online

Access important information about your account online by using the Pitney Bowes My Account service. There's an archive of statements, the ability to see order status information, view product and service information. Monitor your postage usage and identify trends through the INVIEW™ reporting function.
