

DM300™ Digital Mailing System

Powering efficiency.

Intelligent mail goes in-house.

Manage your mail with accuracy and precision.

You depend on your customer communications. That's why your ability to deliver them accurately and on time is crucial. The Pitney Bowes DM300 makes that possible. It simplifies the processing of multiple types of mail while making sure each one has the correct postage.

As compact as it is capable, the DM300 combines an integrated mailing system with our highly advanced, easy-to-use IntelliLink® technology. The result is big system capacity in a space-saving footprint that fits seamlessly into any office environment.

Simplify the complicated.

You'll learn how to operate the DM300 in a matter of minutes. Its user-friendly system takes you step-by-step through processing for greater speed and efficiency with the:

- 7-line graphic display
- Dedicated functions
- Labeled keys
- QWERTY keyboard

More discounts.

The DM300 automatically uses Royal Mail's Mailmark™ service. This applies up-to-date discounts to your mail as you frank. No need to go searching for the best deals or doublecheck anything – it all just happens. Business Mail Advanced is another simple way of reducing your postage costs with the DM300. The service provides substantial savings on first and second class franked letters in return for meeting some simple qualification criteria.

Streamline your processes.

Process time-sensitive projects, daily critical demands and routine mailings with accuracy and precision. Increase your ability to process mail and do more than ever before by eliminating extra steps.

- Select the most effective and economical postal rate with the internal rating function
- Access postage replenishment online, 24/7
- Update postal rate changes automatically
- Satisfy all current postal regulations with digital meter indicia that can adapt to future changes

Turn potential into profit.

Decreasing costs while driving revenue is a win-win scenario. The DM300™ provides the tools you need to:

- Advertise your business on every mail piece by using 5 standard envelope ads or downloading additional ads directly to your machine
- Track and manage postage expenses for up to 50 accounts
- Automatically advance the date to eliminate the wasted cost of returned mail or advance the date manually to get ahead on processing the next day's mail

Make it fast.

Large pieces can slow you down. That's why we've incorporated time-saving answers to odd-sized problems:

- Weigh packages as you mail them with the integrated 5 kg scale or increase its capacity to 7 kg, 12 kg or even 35 kg with an interfaced scale
- Auto feed up to 50 strip tapes for larger mail pieces

Specification	DM300™
