Solutions Engineering & Delivery | Consulting

Achieve operational excellence through expert guidance.

Accelerate and sustain your competitive edge.

Our team of experts are committed to solving your most complex business challenges. Using our outcomes-based approach, we can work with you to assess, recommend and implement solutions that help you resolve performance issues and sustain operational excellence.

We combine rich experience with leading-edge methodologies.

We combine data, analytics and our industry experience to help you achieve your goals.

Our consultants are trained in lean Six Sigma, lean manufacturing and Continuous Improvement (CI) methodologies, and use our innovative data and analytic tools to understand how to maximise efficiency and eliminate waste. We will help you:

- Assess and diagnose business challenges.
- Increase productivity and capacity.
- Improve end-to-end workflow for greater operational performance.
- Increase quality and Service Level Agreement performance.
- Ensure compliance and mitigate risk.
- Manage postage and operational costs.

Rely on the unique value of Pitney Bowes.

The Pitney Bowes Solutions Engineering & Delivery services team of experts combine:

- First-hand experience in managing transactional print and mail operations.
- Industry knowledge of leading-edge technologies and solutions that offer optimum value.
- Innovative tools that leverage the Industrial Internet for real-time data and analytics.
- Mastery in the use of methodologies like Six Sigma, lean manufacturing and other disciplines that drive greater efficiency.
- Rich skills in change management and continuous improvement processes that enable you to compete in a changing environment.

Improve your business outcomes.

Pitney Bowes solution engineers and print and mail operations experts can help you achieve and sustain operational success at every level of your business—technology, work cell, site or enterprise-wide—we help you:

- Access, recommend and implement solutions to reach and sustain operational excellence.
- Design a roadmap for the continuous improvement of

technology, people and processes based upon desired business outcomes.

- Identify opportunities and disruptive value propositions that are unique to your operation or organisation.
- Improve productivity and business performance using data, analytics and proven methodologies.
- Analyse key business issues and develop a solution that addresses costs, quality, risk and compliance.

In everything we do, Pitney Bowes delivers accuracy and precision to help you drive meaningful impact. Our innovative data and analytic tools, methodology and unparalleled knowledge help clients navigate the complex and evolving world of commerce. By working together, we'll help you achieve success.

We're here to help.
