Solutions Engineering & Delivery | Implementation Support

Ensure business outcomes and minimise project cost and risk.

Expedite time-to-value from your investment.

Our experts can help design, integrate and streamline deployment of new solutions across your complex environment, so that you can realise tangible results more quickly. In addition, our highly-skilled implementation support team is ready to help you make changes in technology, people and process to achieve your desired business outcomes.

Get results now, while creating and sustaining operational excellence.

Implementation support is provided by our team of lean Six Sigma certified, experienced transactional print and mail industry professionals.

We can help you:

- Minimise project risk and costs.
- Optimise ROI (Return on investment).
- Minimise TCO (Total cost of ownership).
- Minimise risk and ensure compliance.
- Sustain long-term value.

Accelerate time-to-results through data, insight and expertise.

Offering a comprehensive set of skills and experience, our expert consultants can help you lead complex projects and apply the most effective tools and methodologies to ensure a smooth and successful transformation.

With our market-leading technical domain knowledge in transactional communications—and our transparent and collaborative culture—we can help you strengthen your internal teams by contributing hard-to-find resources, skills and experience to help you define and run projects.

We're here to help you navigate the complex world of commerce.

Our comprehensive approach, innovative methodology and unparalleled print and mail knowledge can help you navigate the complex and evolving world of commerce.

Improve your business outcomes.

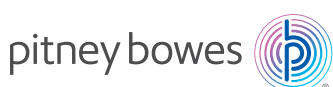

Let our experienced and dedicated team help you transform and sustain operational success.

We can help you:

- Create and deploy project plans that identify and manage risk for faster return on investment and continuous improvement.
- Develop key performance metrics and dashboards to help measure and sustain long-term value.
- Leverage highly-specialised expertise to accelerate time to production while ensuring quality throughout the transformation process.
- Tune your operations and value chain to synchronise to higher levels of operational performance at the lowest cost possible.
- Establish an escalation process and recommend a training plan to ensure the support and success of new solutions.

We're here to help.
