

PitneyShip® Enterprise

Control shipping and mailing costs with a single sending solution.

Achieve visibility and accuracy with a smart, cloud-based solution.

When every department manages its own shipping and mailing, it can be difficult to control costs. Overspending is common when different shipping systems or non-compliant account numbers are used. Plus, it's hard to capture accurate client and departmental charges. Now, one system can assist you in every location. **PitneyShip® Enterprise** is a cloud-based, multi-carrier shipping system that offers greater control, visibility, and accuracy. Manage costs and run your business more efficiently, whether employees are at headquarters, a satellite office, or working remotely.

Centralise operations to improve your bottom line:

- Reduce costs with a consolidated, cloud-based platform.
- View all activity and costs across all locations and carriers.
- Simplify how employees send packages and parcels.
- Standardise processes for accurate accounting and tracking.
- Streamline payments with one monthly bill for major carriers.
- Choose the most cost-effective carrier or integrate your existing carriers with our **bring-your-own-carrier** model.

Take control to make shipping more efficient.

Improved visibility can enhance how you manage and control your shipping operation. **PitneyShip® Enterprise** provides a company-wide view of your spending and activity through a single cloud-based dashboard, allowing you to view every user and location. Instead of dealing with multiple invoices and manual accounting, PitneyShip Enterprise automatically captures all costs by location and user. You can also consolidate carrier charges and make one payment through a dedicated shipping account.

- Use one system across your headquarters, mail centre, satellite offices, and remote workplaces.
- Single sign-on allows for easy user management, adding a layer of security.
- Equip employees with tools to ship and print postage efficiently.
- Import all contacts and verify addresses within one system.
- **Seamlessly integrate your existing carriers** into the platform, giving you the flexibility to maintain relationships with preferred providers while leveraging the benefits of PitneyShip Enterprise.
- **Sits on our 360 platform** suite of solutions

With **PitneyShip® Enterprise**, users can view and compare all carrier-negotiated rates and fees in one place, making it easy to choose the best rate and prevent overspending. Plus, with the **bring-your-own-carrier** model, you can integrate your existing carriers into the system, providing maximum flexibility and control over your shipping options.

Empower employees to make smarter shipping decisions.

With shipping costs estimated to represent up to 10% of your bottom-line expenses, **PitneyShip® Enterprise** helps your employees compare rates and reduce expenses with every shipment.

- Compare rates from multiple carriers side-by-side to identify cost-saving options.
- View accurate information on savings, landed costs, delivery dates, and times.
- Receive rate-shopping alerts to notify employees when cheaper options are available.
- Review delivery options across carriers for more efficient selection.

Trust Pitney Bowes.

For over 100 years, Pitney Bowes has been the trusted leader in mailing, shipping, and commerce. We help your operations become more productive and profitable with innovative solutions, delivery guarantees, consolidated payment options, and access to discounts from major carriers. Our latest innovation, **PitneyShip® Enterprise**, gives you the control and efficiency your business needs for shipping and mailing.

Ensure accuracy in cost and auditing.

Instead of wasting time and resources on manual cost entry, **PitneyShip® Enterprise** automates accounting, capturing all costs with one tool, which helps eliminate complexity and risks.

- Access user-level data for accuracy and clarity through reports and analytics.
- Use analytics to identify continual savings and missed opportunities.
- Enhanced visibility improves compliance with regulatory requirements.
