Business Partner:

Achieve IT USPS® Shipping, powered by Pitney Bowes

# Overachieve in the game of shipping

Achieve IT Solutions, a leading provider of SAP based business management solutions, has partnered with Pitney Bowes. Together, we've added USPS as one of the fully integrated carriers to the Resolv Freight Management software solution. Now, with Resolv, SAP Business One users can access USPS rates and services via Pitney Bowes Complete™ Shipping APIs.

With Resolv, you no longer have to use different computer systems or web services for each separate carrier. It eliminates the need to maintain multiple databases for customer addresses or manually enter information for each shipment. That saves you time and greatly reduces the likelihood of errors.

To learn more, visit [resolv.achieveits.com/PitneyBowesPartnership](https://resolv.achieveits.com/PitneyBowesPartnership)

The Resolv Rate Shop feature allows operators to view shipping rates by various carriers and shipping options. This critical function lets them provide accurate estimates of shipping charges to customers ahead of time, helping you take control of your budget.

Resolv runs seamlessly in SAP, serving as a bridge between SAP users and carrier shipping systems. This includes the USPS communicating directly inside SAP and Resolv. The data is transmitted to the carrier's system, enabling labels to be created and printed without having to leave SAP.

With the partnership of Achieve IT and Pitney Bowes, Resolv users can benefit from:

- Streamlined carrier-compliant USPS label printing from inside SAP Business One.
- USPS® Commercial Discounts and service offerings for significant savings over private carrier options.
- Flexible financing and payment options.
- Outstanding customer care and technical support.
- Guaranteed delivery for USPS Priority Mail.
