Complete™ Shipping APIs from Pitney Bowes

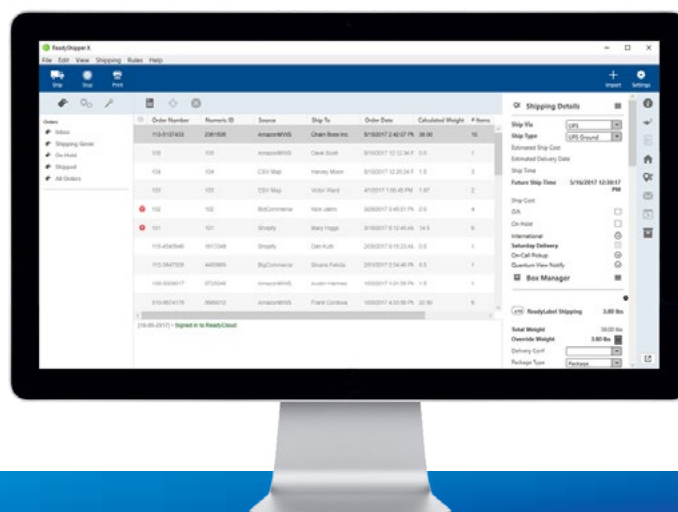

Hybrid cloud solutions from ReadyCloud simplify shipping.

Manually fulfilling tasks and managing data is time consuming and labor intensive for shippers. By combining ReadyShipper X hybrid cloud solution from ReadyCloud with Complete Shipping APIs from Pitney Bowes, shipping becomes fast and easy. What's more, you'll get bigger discounts on USPS Priority, Express Mail and Flat Rate Select.

Powered by our Complete Shipping APIs, ReadyShipper X automatically imports all your orders to simplify shipping operations. With multi-carrier capability, this innovative partnership enables you to generate digital postage—as well as labels—for FedEx, UPS and USPS. With a few simple clicks, you'll update customers in a matter of seconds.

Access and protect customer information.

ReadyShipper X easily integrates into your computer. By capturing data in the cloud, you can access it from anywhere. Instantaneously, you'll keep customer data protected with back-up and recovery of your orders. Engineered with the speed and reliability of a client application, the synthesis of our Complete Shipping APIs and Ready Shipper X provides a superior way to ship, now and in the future.

Get greater discounts with Flat Rate Select.

Why pay dimensional surcharges when you can get dimensional discounts? By using ReadyShipper X, Flat Rate Select will give you significant savings on shipments up to 20lbs that are packaged in your own branding. In addition, Flat Rate Select reduces pricing fluctuations, enabling more accurate shipping cost forecasting.
