

Security excellence delivered for safer, smarter Government.

SendPro® 360: Unmatched security for every agency.

Pitney Bowes SendPro®360 is the worlds most secure, cloud-based sending, receiving, and smart locker management solution. Every SendPro 360 application meets the following security standards:

- FedRAMP Authorized (moderate)
- StateRAMP/ GovRAMP Authorized (moderate)
- 800-53 Rev. 5 Compliant
- 382 Controls over 17 Families
- CCPA/GDPR Compliant
- IL4 Provisional Authorization

Security is paramount in the cloud, particularly a Government environment. Pitney Bowes continues to invest in achieving the highest levels of security certifications and authorizations.

Security (Re)Defined

Critical cloud certifications to protect your agency.

What are FedRAMP, StateRAMP, and DISA?

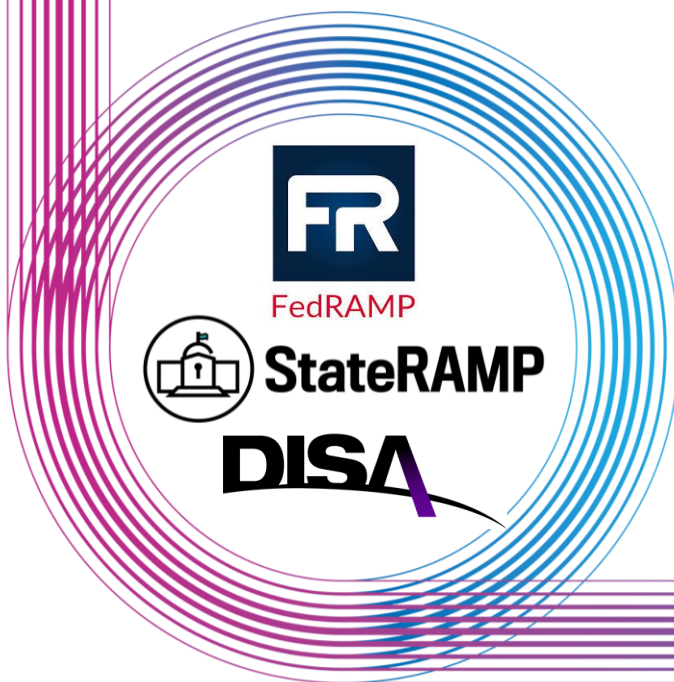

- Government Risk and Authorization Management Programs
- Based on the NIST 800-53 guidelines

What do they do?

- Ensure data and networks are protected
- Reduce duplicative efforts and cost inefficiencies
- Modernize operations by promoting the use of cloud services

How do they work?

- Assess an organizations policies and procedures against NIST 800-53 controls
- Maintains a security repository for reuse
- Authorize against a Low, Moderate or High Impact Level
- Require continuous assessment to uphold authorization

The importance of cloud security

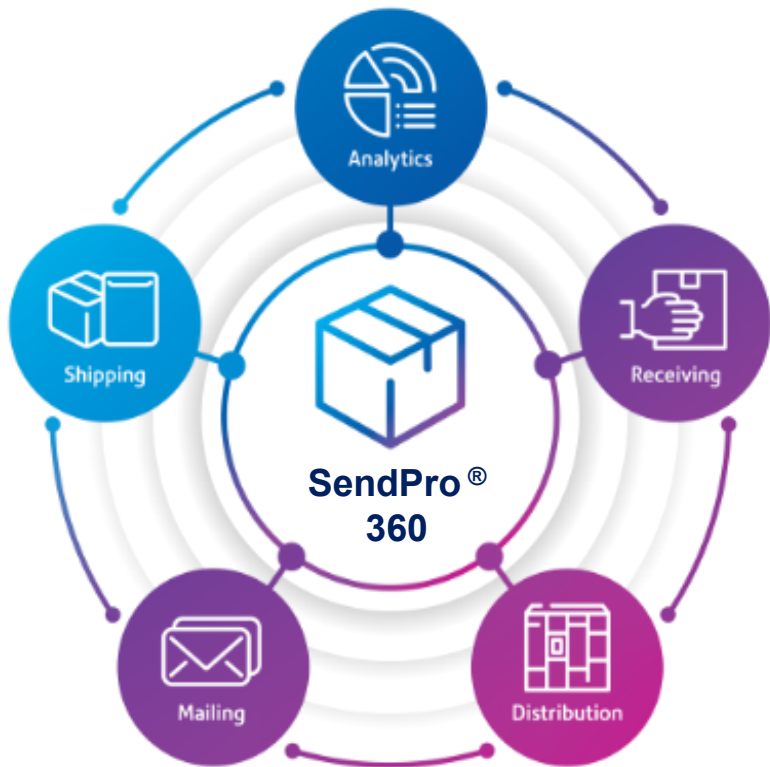

Cloud security is critical for protecting sensitive data, ensuring regulatory compliance, and maintaining the integrity of business operations in an increasingly digital world. Secure, cloud-based solutions help agencies:

- Achieve Regulatory Compliance
- Maintain Business Continuity
- Mitigate Cyber Threats
- Scale with Ease
- Access Control & Monitoring
- Become More Cost Effective

The future of Government cloud technology is here, and it's powered by Pitney Bowes.

Gain new levels of efficiency and security with SendPro® 360

Pitney Bowes SendPro 360

A secure, centralized cloud-first approach to sending and receiving

Our cloud-based platform seamlessly integrates customizable solutions within your organization's shipping and mailing, receiving and distribution operations to create end-to-end solutions with 360-degree visibility and insights that enable smarter decisions.

Available in AWS GovCloud

Our secure platform of solutions helps government agencies of all kinds:

SHIP

Optimize shipping and reduce costs with multi-carrier rate shopping tools and centralized management of carriers and users.

MAIL

Print USPS postage from anywhere – online or from your meter – and simplify preparing, tracking and managing USPS Certified Mail.

OPTIMIZE

Capture every shipping and mailing expense in a single view for complete visibility and new insights for cost control.

TRACK

Gain visibility and control of every package and asset moving across your organization with end-to-end chain of custody reporting.

DISTRIBUTE

Modernize operations with a safe, secure, and convenient way to delivery incoming packages and internal assets.

Tailored for you, by you.

SendPro 360 has a robust, tiered structure to user authentication and permissions system, with customizations, preferences and modules linked to user profiles within the ecosystem.

Additionally, users can set up, configure and manage capability modules and solutions at an entity level. For example, users could only give access to certain modules to the most relevant people in the agency, or users could turn a specific service off altogether.
