Document Printing

Produce high-speed, top-quality color printing while reducing costs.

The HP PageWide E Series elevates inkjet printing to a stunning new level.

Meet a powerhouse for transactional printing.

The HP PageWide E Series was built to make quick work of bills and statements. These inkjet models print dry and cold, with no paper curl. Consequently, they're ideal for mailing and high-volume environments.

Our HP PageWide printers deliver all these advantages:

- **Speed**—Get up to 60 pages per minute in either color or black and white. Less wait time means greater productivity.
- **Efficiency**—Save power. These inkjet models create printouts without heat. Consequently, this uses up to 70% less energy than laser printers.¹
- **Low cost for color**—No more worries about replaceable drums. Reduce your total running costs with lower consumable expenses.

- **Top quality printouts**—Easily produce documents of outstanding clarity and color.
- **Reliability**—Ingenuously designed with fewer moving parts. This helps minimize interruptions and allows for easier maintenance compared to laser printers.
- **Environmentally conscious**—The HP PageWide printers use less packaging and produce less waste. They're clean-room certified for environments such as hospitals and manufacturing.

¹ Energy consumption 0.835 kWh/week based on Keypoint Intelligence/Buyer's Laboratory test report "HP PageWide Managed Color Flow MFP E77650z vs. Competitive Laser Models," January 2019.
