PitneyTrack® Asset

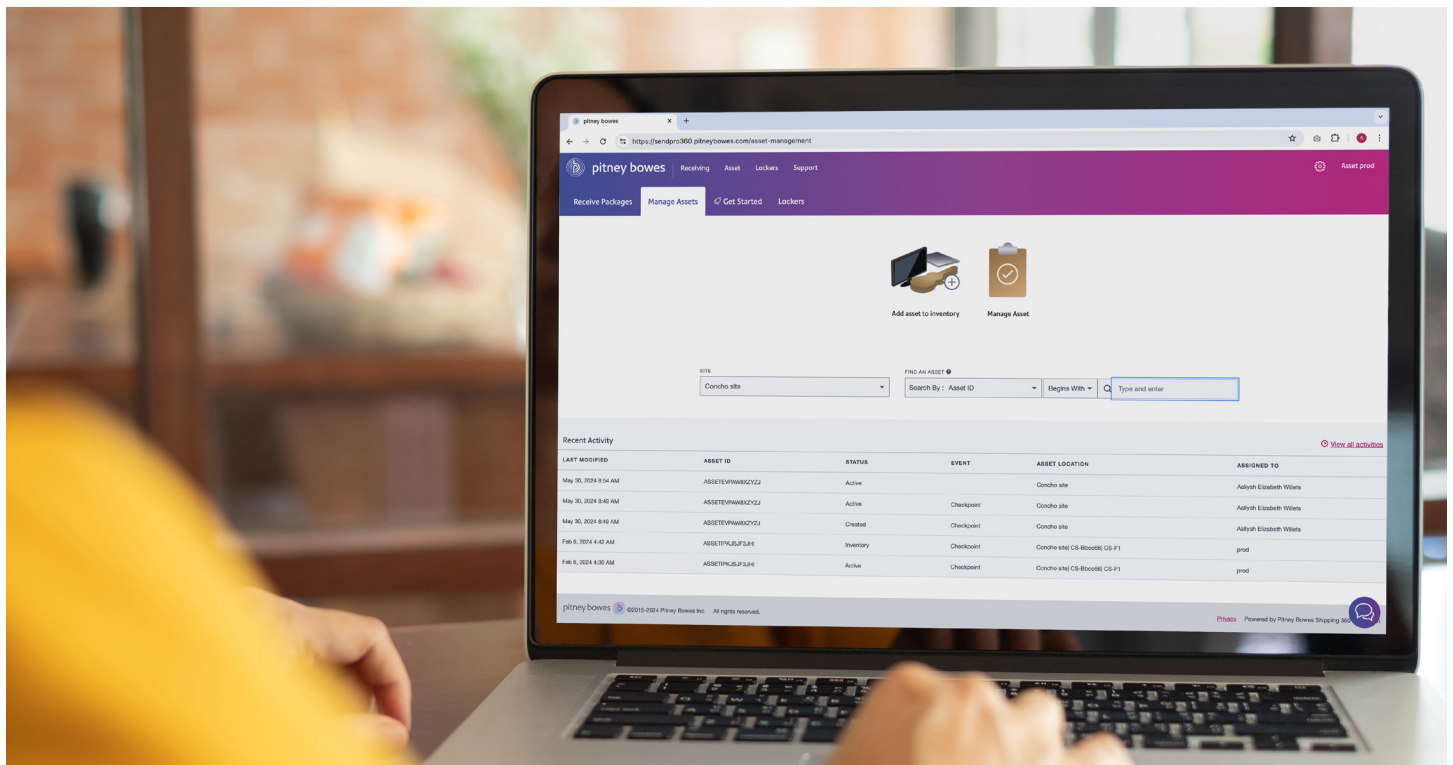

Optimize internal asset tracking with PitneyTrack Asset

Log, track, and deliver assets across your organization with accuracy and ease

PitneyTrack Asset is a cloud-based solution designed to simplify the way you monitor internal assets across your organization. It streamlines the logging, tracking and delivery of your important assets by eliminating manual processes and the costly errors associated with them. Plus, PitneyTrack Asset helps to establish chain of custody, so you'll always know where the asset is located and who has it, at any given time.

No Barcode? No problem.

For items without barcodes, PitneyTrack Asset can assign an ID or even generate a barcode label. Vital details can then be entered into the software, including when it arrived in your department, the condition it was in and the current status and location of the item. With PitneyTrack Asset, you'll experience improved operations that can dramatically impact your bottom line.

Access key tracking and delivery details anytime

PitneyTrack® Asset makes it easy to control the flow of assets in real-time. Your assets can be scanned at different checkpoints using handheld scanning devices or the PitneyTrack mobile app.

- Access all tracking capabilities on the go, including adding, editing, and assigning assets
- Capture delivery signatures or asset photos and quickly retrieve as proof of delivery
- Reserve a locker compartment for delivery into ParcelPoint™ Smart Lockers

Boost efficiency and productivity

- Log and monitor assets with customized status fields
- Eliminate costly errors associated with manual processes
- Quickly import asset lists
- Automatically send notifications when asset is ready for pickup

Gain accountability

- Minimize lost or misplaced items to prevent duplicate purchases and save money
- Check status with real-time tracking and visibility
- Locate asset information with robust search capabilities
- Capture delivery signatures and photos to record asset condition

Enhance security and compliance

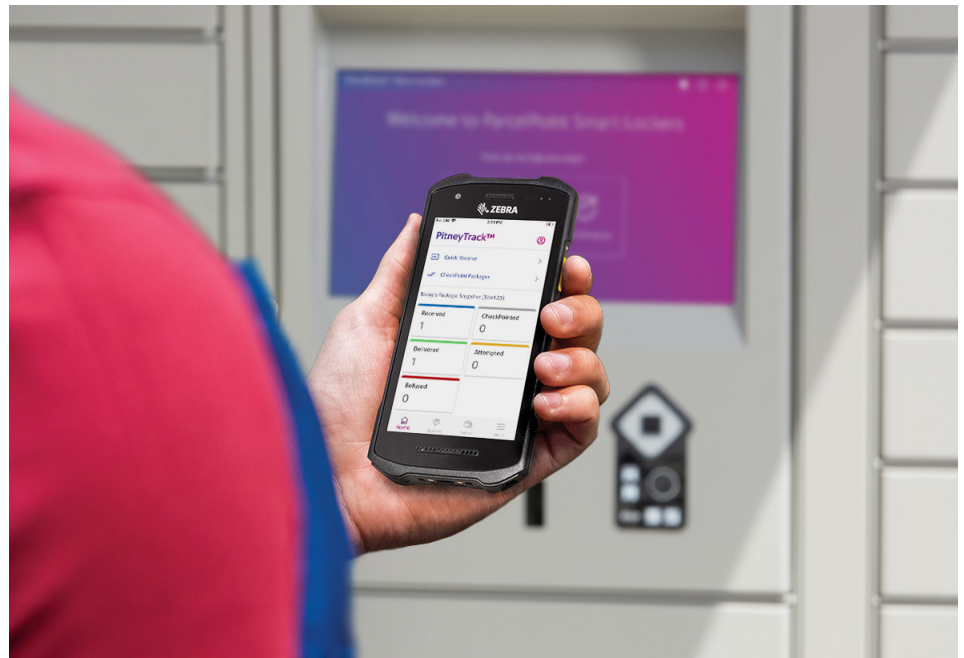

- Right recipient confirmation with proof of delivery.
- Document chain of custody with end-to-end tracking from the time an item enters your facility to when the item reaches the recipient
- Single-sign on (SSO) for security and authentication

Distribute, exchange, and receive assets—safely and securely

With more people working remotely, organizations are tasked with finding

efficient ways of delivering equipment and supplies to their employees when it is convenient for them. With automated notifications, unique barcodes and self-service access, employees can pick-up their assets on their own time. ParcelPoint™ Smart Lockers offer a safe, secure, and convenient way to deliver, exchange and return internal assets.

PitneyTrack Asset seamlessly integrates with ParcelPoint Smart Lockers. Together these solutions help track and deliver assets with increased visibility, accountability and efficiency.
