

From insights to impact

Make better, data-driven shipping and mailing decisions with smarter analytics

Manual processes delay action.

Joe has to wade through mountains of data to do his job.

Mistakes happen.

Joe manually downloads postage expenses from more than 20 individual devices. Naturally, human error creeps in.

It's impossible to keep it all straight.

Joe must update cost account information by hand, individually for every machine.

Analysis takes too much time.

Large, complex datasets, inconsistent formats and massive spreadsheets make analysis a huge hassle.

Reports are always running late.

Compiling and emailing reports manually is the last thing Joe wants to do.

PitneyAnalytics® accelerate insight.

Sabrina has everything she needs all in one place.

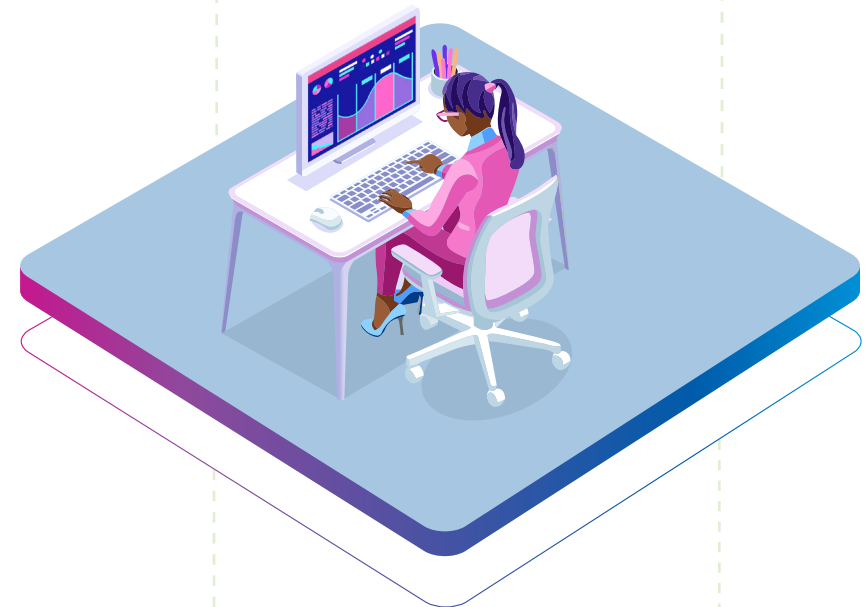

Automation accelerates accuracy.

Data from every device feeds automatically to a single dashboard, providing Sabrina with instant and accurate visibility.

Data-driven decisions happen fast.

Sabrina gets data updates automatically, so she can focus on optimizing spend.

It's easy to uncover opportunity.

Sabrina simply selects the data visuals and views that help her make smarter shipping and mailing decisions.

Reports happen like clockwork.

Reports generate automatically, so Sabrina consistently delivers on time.
