

Shipping & Mailing

Outbound and Inbound Package Management

SendSuite® Live

Add greater visibility and control to your shipping operations.

Take control through integration.

It's no secret. Transportation costs are on the rise and are expected to follow that trend for some time. Economic changes have also contributed to higher inventory-carrying costs, placing even more pressure on logistics operations to reduce expenses and put a hold on eroding profits.

Challenges like these deserve attention. Whether shipping parcels from e-commerce activity, or managing multi-model LTL freight shipments across the country, every shipper can benefit from an integrated solution that can provide control and visibility to the shipping operation.

Plan, route and manage shipments from a single platform.

SendSuite® Live is a powerful solution perfect for production shippers, designed to help you operate more efficiently and cost-effectively. The web-based services allow the flexibility and power to effectively plan, route and manage shipments providing the best balance of service and cost for your operation. You'll get:

- Improved cost management.
- Streamlined processes.
- Effective supply chain management.
- Overall cost accounting.

Save money across the board.

With constant pressure to reduce costs, all aspects of the shipping operation need to be managed. We can help improve efficiency by:

- Highlighting the optimal shipping cost by accessing rates and services from multiple parcel and freight carriers.
- Optimizing routing capabilities with the ability to mix parcel, LTL and TL options.
- Providing consolidated reports for contract negotiations with carriers, to ensure the best rates are implemented throughout the organization.
- Eliminating unexpected surcharges with address verification, residential status confirmation and extended delivery areas.
- Automating spot quoting for truckload shipments by e-mailing carriers with deadlines to competitively bid on a specific shipment.

Streamline your shipping process.

Discover how easily it integrates with other systems, giving you full visibility of transportation information across all platforms.

- Capture information from all carriers, LTL and TL in one central location, providing one consolidated view for managing your entire shipping operation.
- Allow shipping operators to ship small parcel, LTL, TL, International and multi-pack shipments all from one, easy-to-understand, intuitive interface.
- Simplify and automate the process with appropriate shipping labels and necessary documents from WMS, ERP and IM systems, for increased productivity.
- Improve customer service response rates with visibility of the entire shipment process including instant access to shipment history.
- Reduce human error by generating shipping documents such as Bill of Lading, Airbills, COD Tags and Return Labels automatically.

Simplify supply chain management.

Integrate your ERP, WMS and Order Management systems to give you a simple, error-proof process that ensures timely and accurate shipments.

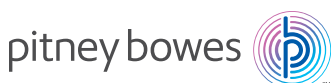

- Simplified fulfillment tools ensure efficiency in the warehouse when packing, labeling and shipping orders.
- Reduce shrinkage levels through integration with inventory management systems and tools.

Gain visibility across all shipping activities.

Keep costs down with improved visibility into your organization's transportation spend and enhanced cost allocation.

- Consolidate all of your shipping activity data from different systems in one place, giving you the ability to reconcile carrier invoices, and ensure proper accounting and cost allocation.
- Allocate costs with consolidated data from information silos, providing accounting a dashboard view of the total cost of packing, selling and transporting goods to customers.
- Finance can match orders, shipments, items and delivery confirmation to reduce Days Sales Outstanding (DSO) by minimizing invoice disputes with proof of delivery.
