

Action Required: Reauthenticate UPS® Shipping App before SendPro® Enterprise Migration

Dear Valued Client,

As communicated in an email dated November 11, 2024, we are migrating your SendPro® Enterprise (SPE) system to the Amazon Web Services (AWS) platform.

You'll need to reauthenticate in the UPS® shipping app to ensure a smooth transition to the new platform on March 18th. Please read below and follow the easy steps to avoid delays after the migration has been completed.

Timing: Complete now or any time before the migration.

Action: Reauthenticate in the "UPS OAuth Pre AWS Migration app." You'll need your UPS login credentials.

- Log in to SPE and select the app "**UPS OAuth Pre AWS Migration.**"
- Check the box under "**I agree,**" click **NEXT** and **OK**.
- You'll be taken to the UPS login screen. Enter your login credentials, check the box to agree to the UPS terms, and click **Continue**.
- You will be automatically redirected to SendPro Enterprise. Click "**Close Window**" and click "**OK**" until you see the message "**Process completed.**" Now you can start shipping.

Thank you for your cooperation.
