Glossary of Terms for Wealth Components

Liquid (Financial) Assets

Assets that are either "cash" or can be converted to cash on short notice, and easily. They are mainly financial type assets.

Interest-Bearing Investments

Fixed income instruments such as chequing accounts, deposits, bonds, and various investment certificates (e.g. GICs).

They can be grouped into four categories:

- 1.) currency and deposits – these refer to all deposits at various financial institutions;
- 2.) short-term papers – these are Treasury Bills and marketable short-term notes issued by a variety of financial and non-financial institutions;
- 3.) bonds and savings certificates – these include all bonds issued by all levels of government, institutions, and corporations; and
- 4.) other financial investments – these include a range of items such as mortgages, interest annuities, and accrued interest on bank deposits.

Equity Investments

Financial holdings as mutual funds and stocks. Mutual funds include balanced, Canadian and foreign equity, bond, dividend, money market, and mortgage funds.

Non-Liquid Assets

Hard or tangible assets that can be sold to raise cash or can be used as security to borrow money. Beginning in the 2005 Wealth update, the value of the primary residence is presented as an estimated non-liquid asset. Other non-liquid assets, such as autos and household contents, are not taken into account.

Residential Real Estate

The estimated market value of private residences/homes owned by individuals. Primary residences are those of owner occupied households.

Liabilities

Outstanding debts held by households and, generally speaking, this variable quantifies what is owed on residential mortgages and personal loans.

Residential Mortgage

The amount of money owing on the principal of primary residences/ homes.

Personal Loans

Cover a variety of consumer debts, including credit cards and loans for such purposes as vehicle purchase, investment, and unsecured consumer credit. Specifically, three personal loan variables are included: credit card debt, installment loan debt, and revolving credit debt.

Total Net Worth or Wealth

Is broadly defined as total assets less total liabilities. Assets as discussed here include financial investments such as chequing accounts, term deposits, bonds, stocks, and mutual funds as well as tangible assets including primary residence. Liabilities consist of consumer debts, mainly residential mortgages and personal loans. The difference represents an estimate of household net worth. While useful for many applications of financial market analysis, it does not explicitly include the “unmeasured components” such as other non-liquid assets – autos, household contents, cash values of life insurance, etc.
