Product Overview

Pitney Bowes GeoEnrichment Property Attributes dataset lets you enrich your location information with more than 200 property attribute fields on over 113 million US properties. This includes 99% of the residential and commercial properties in the United States. GeoEnrichment Property Attributes data is available in the following variants:

- GeoEnrichment Property Attributes - Basic
- GeoEnrichment Property Attributes - Standard
- GeoEnrichment Property Attributes - Ultimate
- GeoEnrichment Property Attributes - Historical Sales

Change Log

2019.06.0

- **Vacant** field in the data has been updated with a new process.
- The Property Attributes - Basic, Standard, Ultimate, and Historical Sales data has been refreshed for this release.
- The refreshed Property Attributes data is compatible with the 2019.05.0 version of Master Location Data.

2019.03.0

- Two new categories, Hospitals and Industrial, have been added to Q1 2019 (2019.03.0) replacement cost data.
- Multi-Family category now includes Duplex, Triplex and Quadplex property options, increasing the count of Replacement Cost records.
- Replacement Cost and Replacement Cost Confidence field values are available for those records where required input fields were available for calculation (such as PROP_IND, PROP_LIVINGSQFT, PROP_COND, etc.).
- Historical Sales data is refreshed for the 2019.03.0 release.
- Refreshed Historical Sales data is compatible with the 2019.02.0 version of Master Location Data.

2018.12.0

- We have introduced a new column, **PROP_REPLACE_CONF** in the **Standard** and **Ultimate** datasets.

Known Issues

The following issues were identified in the current release:

- **PAD-540**: There are few records in the data for which the **prop_replacecalc** column shows null value for the financial institution category.
- **PAD-541**: There are few records in the data for which the **prop_replacecalc** column shows null value for the hotel and motel categories.
- **PAD-647**: There are few records in the data where the **prop_replace_conf** field shows null value but the adjacent **prop_replacecalc** field has some.
- **PAD-648**: The **prop_pool** column has values as 1 which is not defined in lookup.

- **PAD-649:** There are around 200 records in which Business name field has some inappropriate values in digits.
- Some First and Last Name records have alpha-numeric values, for example 138548591|4-T, 138556091|376A, 138573438|4, etc.
- Noted some extreme values in the data for particular columns such as, "999999998" for PROP_LANDSQFT, 9999999999900 for PROP_ACRES, etc. The extreme values can be high or low respective to the field.
- There are some special characters like "&, %, etc." in few records for City and Street columns.
- There are Duplicate LinkID values in the data.

Getting Support

If you have any questions or concerns, you may contact our support or fulfillment team directly by phone or email:

Software Support - 1.800.367.6950

Email - software.support@pb.com
