Summary

The StreetPro suite of data products offers detailed and authoritative street-level vector maps, with over 40 layers of information included. Worldwide coverage is available in a consistent specification and data model.

The StreetPro suite consists of two related products:

- **StreetPro Classic** is the full featured version of the product suite including detailed streets information, accurate street topology for basic routing purposes, rich feature information and administrative boundaries.
- **Postcodes & Administrative Boundaries** is a reduced version of StreetPro including Postcodes, Suburbs and Administrative boundaries.

What's New?

Installation Folder Structure changes

From 2017.03, we have implemented new folder structure for data installation to align with the upcoming global installer release. The "**Extra**" folder has been removed and content of it is available under the "**Data**" folder. Following installation, the directory structure shown overleaf should have been automatically created in the selected location.

Data folder contains:

- Data Layers (Refer Product Guide for details)
- miCodemaster table (PBS internal feature code for the product layers) and Language table (Ing.*)
- Workspace (hoko1.wor)

_basemaps folder contains:

- marinelabels layer (Contains label for Seas and Oceans of the world)
- ocean layer (Refer Product Guide for details)
- wrlda0 layer (Refer Product Guide for details)

_metadata folder contains:

- metadata xml of the product ('StreetPro_Hong Kong_2017_03.xml)
- metadata pdf of the product ('StreetPro_Hong Kong_2017_03.pdf)
- logo images (Pitney Bowes Software and TomTom)

_docs folder contains:

- Data_Feedback.pdf
- EndUserLicenseAgreement_Feb2015.pdf
- Postcode_Admin_Hong Kong_Product_Guide_Link
- Postcode_Admin_Hong Kong_Release_Notes_Link
