

StreetPro Indonesia v2013.01

StreetPro is Pitney Bowes Software's flagship street data product that offers comprehensive and current street centreline and address information suitable for a broad range of applications and services.

What's Improved?

Below is a list of changes made during this release of the StreetPro Indonesia product range.

- Updated **Streets** coverage (Kota Manado, Jambi, Padang, Yogyakarta, and greater Jakarta).
- **6,000+** new points of interest in the **Features** layer.
- Increased coverage and accuracy for **Features** layer (Kota Jakarta, Bandung, Jambi, Banjarnasin, Karo, Semarang, Surabaya and Sumatera Selatan).
- Update of the **Village (Desa)** administration layer.
- Updates to the **Land Use** layer.
- Addition of a **Building Footprints** layer in some major cities.

StreetPro: The Enhanced Value

- StreetPro is engineered with spatial display, analysis and business integration in mind.
- Pitney Bowes Software's data development team employs a rigorous quality control process, which ensures the highest quality street data is available to our customers.
- StreetPro can be resourced for geocoding and mapping with Pitney Bowes Software's wide range of desktop and enterprise offerings.

Data Feedback

As part of our continuous quality improvement program, Pitney Bowes Software actively requests feedback from customers to report any anomalies or changes, or to request future enhancements to our products.

The feedback that we receive from our customers is vital to the continual quality development of our data products.
