

StreetPro Indonesia v2014.01

StreetPro is Pitney Bowes Software's flagship street data product that offers comprehensive and current street centreline and address information suitable for a broad range of applications and services.

What's Improved?

Below is a list of changes made during this release of the StreetPro Indonesia product range.

- Updated **Streets** coverage (Palembang, Pekanbaru, Surabaya, Tasik Malaya).
- **4,000+** new points of interest in the **Features** layer.
- New coverage areas for **Streets** layer (Lebak, Sukabumi, Cianjur, Garut, and Madura Districts).
- Updates to the **Parks** layer.
- Updates to the **Land Use** layer.
- Additional 2,000 records in the **Building Footprints** layer.

StreetPro: The Enhanced Value

- StreetPro is engineered with spatial display, analysis and business integration in mind.
- Pitney Bowes Software's data development team employs a rigorous quality control process, which ensures the highest quality street data is available to our customers.
- StreetPro can be resourced for geocoding and mapping with Pitney Bowes Software's wide range of desktop and enterprise offerings.

Data Feedback

As part of our continuous quality improvement program, Pitney Bowes Software actively requests feedback from customers to report any anomalies or changes, or to request future enhancements to our products.

The feedback that we receive from our customers is vital to the continual quality development of our data products.
