## Summary

The StreetPro suite of data products offers detailed and authoritative street-level vector maps, with over 40 layers of information included. Worldwide coverage is available in a consistent specification and data model.

## Workspace Changes

- The phil\_int\_mipro125.wor workspaces make use of the enhanced rendering features in MapInfo Professional 12.5.

**Caution:** Any workspace file with "mipro125" in its name can only be used with MapInfo Professional 12.5.

## What's New?

- From 2015.09, we have implemented a new \*.mws workspace file designated as **xxx\_streetpro.mws** and **xxx\_streetpro\_local.mws** (for Non Latin countries), where **xxx** represents three (3) letter country code.

The workspace has been optimised to enable raster tile generation within Spectrum Spatial; focusing on both tile rendering speed and representation of key geographical features at appropriate scales within the map view. This allows users to overlay their data providing geographical context and insight into what's important to them.

- Standard updates (Geometry, Street names, Build-up-area and House number) done spread over entire country on all network types

## StreetPro Philippines Feature Count Statistics

Table	Description	Local Names	Count 2014.09	Count 2015.09
phila1	Administrative Level 0	Philippines	*560	*560
phila1	Administrative Level 1	Region	31	31
