Summary

The StreetPro suite of data products offers detailed and authoritative street-level vector maps, with over 40 layers of information included. Worldwide coverage is available in a consistent specification and data model.

Workspace Changes

- The phil_int_mipro125.wor workspaces make use of the enhanced rendering features in MapInfo Professional 12.5.

Caution: Any workspace file with "mipro125" in its name can only be used with MapInfo Professional 12.5.

What's New?

- From 2016.09, we have implemented a new *.mws workspace file designated as **xxx_streetpro.mws** and **xxx_streetpro_local.mws** (for Non Latin countries), where **xxx** represents three (3) letter country code.

The workspace has been optimised to enable raster tile generation within Spectrum Spatial; focusing on both tile rendering speed and representation of key geographical features at appropriate scales within the map view. This allows users to overlay their data providing geographical context and insight into what's important to them.

- Upgrade of 1950 km Basic Attributed Street Network to Fully Attributed by addition and update of the road attributes Streetname in 71 Administrative Areas
- Update of the road network geometry and road attributes Streetname along 77 km roads
- Addition and update of Land Use features in Cebu, Davao and Manilla, resulting in the addition of Cemetery Ground (1), Hospital Ground (5), Island (1), Park/Garden (23), Stadium Ground (5), University/College Ground (32) and Zoo Ground (1)
- Removal of 3 POIs type Park and Recreation Area which are considered duplicates
- Addition and Update of POIs done throughout the country

phils4	Street Level 4	15,337.32	15,339.47
phils5	Street Level 5	89,265.22	92,084.19
phils6	Street Level 6	19,900.65	19,887.71

Known Issues

- Not Applicable

Fixes

- Administrative layers of Philippines has been updated and duplicity in the data has been removed. This has resulted in the change of administrative layer statistics
