Summary

The StreetPro suite of data products offers detailed and authoritative street-level vector maps, with over 40 layers of information included. Worldwide coverage is available in a consistent specification and data model.

What's New?

Installation Folder Structure changes

From 2017.03, we have implemented new folder structure for data installation to align with the upcoming global installer release. The "**Extra**" folder has been removed and content of it is available under the "**Data**" folder. Following installation, the directory structure shown overleaf should have been automatically created in the selected location.

_basemaps folder contains:

- marinelabels layer (Contains label for Seas and Oceans of the world)
- ocean layer (Refer Product Guide for details)
- wrlda0 layer (Refer Product Guide for details)

_metadata folder contains:

- metadata xml of the product ('StreetPro_Hong Kong_2017_03.xml')
- metadata pdf of the product ('StreetPro_Hong Kong_2017_03.pdf')
- logo images (Pitney Bowes Software and TomTom)

_docs folder contains:

- Data_Feedback.pdf
- EndUserLicenseAgreement_Feb2015.pdf
- StreetPro_Hong Kong_Product_Guide_Link.pdf
- StreetPro_Hong Kong_Release_Notes_Link.pdf

Data folder contains:

- Data Layers (Refer Product Guide for details)
- miCodemaster table (PBS internal feature code for the product layers)
- Workspaces (*.mws and *.wor)

Table Structure Changes

The table structure have been changed for thirteen (13) tables (if available) such as **hokoap**, **hokob**, **hokofi**, **hokofr**, **hokolc**, **hokolu**, **hokonf**, **hokop**, **hokopu**, **hokore**, **hokost**, **hokow**, **hokowm**. These changes have been done to optimize display and rendering of workspaces in Spectrum Spatial (hkg_streetpro.mws).

Refer Product Guide for details in Table Structure Changes.

Spectrum enabled mws workspace

From 2017.03, we have implemented a new *.mws workspace file designated as **hkg_streetpro.mws** and **xxx_streetpro_local.mws** (for Non Latin countries), where **xxx** represents three (3) letter country code.

The workspace has been optimised to enable raster tile generation within Spectrum Spatial; focusing on both tile rendering speed and representation of key geographical features at appropriate scales within the map

Workspace Changes

- The **hkg_streetpro.wor** workspaces make use of the enhanced rendering features in MapInfo Professional 15.2.

Caution: Any workspace file with " **hkg_streetpro.wor** " in its name can only be used with **MapInfo Professional 15.2**.

Data Updates

- Geometry and Name improvements on 46 Land Use features
- Update(addition of new POIs, mainly POI type Shop, Repair Facility, Company, Restaurant, maintenance of exiting POIs, and update of POIs) done on multiple POI types spread all over countries leading to increase/decrease of POIs

StreetPro Hong Kong Feature Count Statistics

Table	Description	Local Names	Count 2016.03	Count 2017.03
hokoa1	Administrative Level 0	Hong Kong	*8	*8
