

StreetPro China v2017.09

The StreetPro suite of data products offers detailed and authoritative street-level vector maps, with over 30 layers of information included. Worldwide coverage is available in a consistent specification and data model.

Content for China

Detailed information and content is available in major urban locations (Beijing, Shanghai, Guangdong, Qingdao, Tianjin, Qinhuangdao, Shenyang, Chongqing, Nanjing, Haikou, Xiamen, Fuzhou, and Dalian). Other parts of the country currently have coverage excluding districts, points of interest and detailed streets (main roads and highways are available across the whole country).

What's New?

Below is a list of changes for this release of the StreetPro China product range.

- Addition or extension of several Highways and Expressways in the **Streets** layer
- Added FUZHOU CHANGLE INTERNATIONAL to the **Airport** layer
- Updates to **Administration** layers
- New and extended **Subway lines** plus associated new stations
- New **POIs** in Beijing, Tianjin, Shanghai, Guangzhou and Shenzhen

Data Feedback

As part of our continuous quality improvement program, Pitney Bowes actively requests feedback from customers to report any anomalies or changes, or to request future enhancements to our products.

The feedback that we receive from our customers is vital to the continual quality development of our data products.

Please direct all feedback, data support issues and enhancement requests to:
