  - **Queensland (QLD)**: Brisbane Valley Highway and Warrego Highway alignment and interchange upgrade, Bruce Highway updates (Roys Road and Bells Creek Road interchange, Pumicestone Road interchange, alignment updates between Vantassel and Cluden), Roma-Condamine Road (Yuleba Creek bridge).
  - **Victoria (VIC)**: Western Highway (Ballarat to Beaufort) alignment updates, Princes Highway East (Traralgon East, and Rosedale) alignment updates, Koo Wee Rup Bypass has been upgraded from proposed.
  - **South Australia (SA)**: Penola Southern Bypass has been upgraded from proposed.
  - **Western Australia (WA)**: Ennis Av and Port Kennedy Dr intersection alignment updates, Ravensthorpe Heavy Haulage Route has been upgraded from proposed.
  - **Tasmania (TAS)**: East Derwent Highway and Goodwood Main Road alignment and interchange upgrade.
- **110,122\*** Kms of new and updated roads.
- **909** Kms of new and updated Freeways and Highways.
- **1,361** Kms of new and updated main roads.
- **2,040** Kms of new and updated connector roads.
- **23,501\*** Kms of new and updated local roads.
- **502,861\*** individual inserts, updates and deletes to the road network.

## Known Issues (within Queensland Road Network)

After the v2014.10 update of StreetPro, a Project was undertaken to incorporate a dataset of tracks and trails, sourced from the QLD Department of Parks and Wildlife Services. A semi-automated process was developed to integrate the dataset into the Streets data for QLD, however, the process added a number of artefacts and anomalies, which inflated the counts, marked with ‘\*’, as quoted above. A number of artefacts remain and are currently being manually reviewed and corrected. Once finalised, estimated to be late July, an update will be issued.

## StreetPro Display Layers and Spectrum Spatial

From this release, the National version of StreetPro Display will contain a number of new layers that will allow for the data to be used within Spectrum Spatial. These layers are contained within the “Subset” sub-folder in the Data folder.

## Parks Layer

- 1,493 new Park regions.
- 61,600 updates from corrections and updates to attributes and / or alignment.
- Park objects representing Golf Courses have been moved to the Land Use layer.

## Features Layer

- 1,700 changes to the Features layer.

## Land Use Layer

- (Now) Includes Golf Courses.
- 56,000 changes to the Land Use.

## Railway Lines and Railway Stations

- 4,350 changes to the Railway lines.
- 98 changes to the Railway Stations.

## Upcoming Changes (v2015.10)

### Streets

The definitions currently assigned to Roadtype 300 and 301 will be swapped for the v2015.10 release. So, Highway segments will change from Roadtype 300 to Roadtype 301, and Freeway segments will become Roadtype 300.

We will be doing a large amount of data changes and updates for the v2015.10, therefore a Change Log or Incremental file may not be produced for the v2015.10 release.

Any further changes will be communicated before the v2015.10 release, with any major structural changes being integrated for the v2016.04 release.

## Summary of Road Network Changes
