Product Overview

StreetPro Traffic

StreetPro Traffic data provides information about the relative traffic volumes on the StreetPro road network. StreetPro Traffic is provided as an add-on to the StreetPro Navigation and StreetPro Navigation Premium Products. StreetPro Traffic utilises FCD to provide aggregate counts of the number of probe devices that were recorded on a road segment within the StreetPro road network during a specific hour of a weekday or weekend day. These are provided aggregated by month.

StreetPro Traffic Currency

The StreetPro Traffic data is acquired from our trusted partners and is provided for the 12 months preceding the release date. This ensures that seasonal changes in traffic volumes are captured and provided. An average over the 12 month period has also been supplied to give a more simple solution, if required.

For more information on StreetPro Traffic data, refer to it's product guide available [here](#).

What's New

Following are the countries for which refreshed datasets have been provided in this release:

1. Canada
2. United States of America (USA)

Data Statistics

Known Issues

Following are the known issues:

- The **StableID** field is blank for some records where probe count information is not available
- For some records in the AVE files of the various states of USA (i.e. *_2018_AVE.TAB files), the value for Year is wrongly set to 2017. The correct value of Year for all such records in the AVE files should be 2018
