Overview	4
World StreetPro Variants	4

Overview

The World StreetPro data product offers an intermediate level of mapping solution for the World, with 16 layers of information. It includes roads, railways, international and administrative boundaries, urban areas, coastlines, waterbodies, landcovers, gazetteers, airports, stations, ferries, and railways. The worldwide data coverage is available in a consistent specification and data model.

Note: To get more details on the product and its variants, refer to the product guide available [here](#).

What's new in this version

This release of World StreetPro contains the annual data refresh for the different variants of World StreetPro. The exact counts of features and street lengths are mentioned in the [Data Statistics](#) section below.

Note:

- The data can now be accessed simply by unzipping the product .zip archives. The folder structure and the data files within these zip archives have been described in the Product Guide document found [here](#). The installation .exe, included in the previous versions of the product, has now been discontinued.
- Due to delayed availability of the source data for some of the Asian countries, the Asia and the Global versions of World StreetPro 2019 will be released later during the first quarter of 2020.
