## Aura™ Release 1.6.0 – Product Release Announcement

March 2012,

Pitney Bowes Software is pleased to announce the release of Aura™ Release 1.6.0. This release is available by Internet download and media (upon request) for Windows. **We recommend that you review this document, and the Aura™ 1.6.0 Release Notes** (available at [www.g1.com/support](http://www.g1.com/support)), **for detailed information on the scope of changes for this release.**

### Release Features

- Enhanced the speed when loading workflow records in the Aura database; optimized the performance of the Aura application while viewing records; and enhanced support for concurrent transactions when processing multiple operations.
- Enhanced the address exception support by automating support for USPS Nixie record ingestion from MAIL360™ Data Manager; and allowing for the automatic creation of address coding exceptions from USPS CASS™, ACS™, and NCOA™ applications for a new business entity.
- Allowance for purging the workflow data from the Aura database based upon your organization's retention policy.
- Allows you to review exception records while a new CASS™/ACS™/NCOA™ file is being ingested in the Aura application at the same time.

### Release Documentation

You can download free copies of the Aura™ documentation from [www.g1.com/support](http://www.g1.com/support).

### Release Availability

If you have any questions, please use our [Online Case Management System](#) to create a Support Case. You may also contact us by telephone at **1-800-367-6950** to speak with a Technical Support Representative.

Sincerely,

Kevin Ricks  
Sr. Product Manager, Communications Management Products
