

CODE-1 Plus™ International

Version 1.8.4

International Postal Database Q3 2018 Release Notes

This document contains information on the Third Quarter 2018 International Postal Database update for CODE-1 Plus™ International.

Contents:

What's New	2
Installation	5
Country Levels	7

What's New

The Third Quarter 2018 International Postal Database contains updated country data. For a complete list of countries and the level at which the database recognizes countries, see [here](#).

Note: Although the Third Quarter 2018 Database is compatible with the previous CODE-1 Plus™ International 1.8.3 software versions, it is highly recommended that you install the CODE-1 Plus™ International 1.8.4 software in order to benefit from the enhancements included in the 1.8.4 release. Please see the installation instructions for your respective platform for information on installing the software. You can find this document at:

<https://www.pitneybowes.com/us/support/products/software/code-1-international-support.html>

The CODE-1 Plus™ International 1.8.4 software release contains enhancements that improve address matching for all countries.

Updated Country Data

The following countries have been updated for the Third Quarter 2018 database:

Country Name	ISO 3116-1 Alpha-2	ISO 3116-1 Alpha-3	Changes
Australia	AU	AUS	
Austria	AT	AUT	Standard data set, (Data.House), (Data.Street).
Cambodia	KH	KHM	New: Updated province and locality listing. Sub-locality and post office information added.
Cayman Islands	KY	CYM	
Denmark	DK	DNK	
Faroe Islands	FO	FRO	
Finland	FI	FIN	

Country Name	ISO 3116-1 Alpha-2	ISO 3116-1 Alpha-3	Changes
French Southern Territories	TF	ATF	New: District listing.
Greenland	GL	GRL	
Hong Kong, SAR China	HK	HKG	New: Complete Street listing.
Hungary	HU	HUN	
Indonesia	ID	IDN	New: Updated postcode directory on the locality level.
Iceland	IS	ISL	
Latvia	LV	LVA	
Luxembourg	LU	LUX	
Mexico	MX	MEX	
Myanmar	MM	MMR	New: Updated postcode directory with comprehensive listing of localities and sub-localities.
New Zealand	NZ	NZL	Postcode Address File (PAF).
Norway	NO	NOR	Standard data set, (Adresseregister).
Poland	PL	POL	
Portugal	PT	PRT	
Russian Federation	RU	RUS	Standard data set.
Slovakia	SK	SVK	New: Postcodes for pack stations and individual post office boxes added.
Slovenia	SI	SVN	
Svalbard and Jan Mayen	SJ	SJM	

Country Name	ISO 3116-1 Alpha-2	ISO 3116-1 Alpha-3	Changes
Switzerland	CH	CHE	
Uruguay	UY	URY	New: The data set has been upgraded to the premise level.
Vatican City (Holy See)	VA	VAT	New: Updated street listing. Post office information added.
Viet Nam	VN	VNM	New: Postcodes directory containing new 5-digit postcodes.
United Kingdom	GB	GBR	Standard data set, (PAF Premise level), (PAF Thoroughfare level).

Additional Information

- **Eswatini (SWZ)/(Formerly Swaziland (SWZ))**— The Head of State of the Kingdom of Swaziland has declared that the country's official name has changed to Kingdom of Eswatini. The Universal PostCode DataBase will reference the country as Eswatini. The country's ISO Code remains unchanged as SWZ.
- **Viet Nam (VNM)**— The Ministry of Information and Communications has introduced a new national postcode system for Viet Nam. The new postcodes consist of five digits. The first digit identifies the regional code. The second digit refers to the provincial, municipal and central code. The third and the fourth digits identify the district and central administrative unit codes. The fifth digit refers to the final postcode subject (commune, postal service point, etc.). The complete description of the new postcode system for Viet Nam has been published at:

<http://www.upu.int/fileadmin/documentsFiles/activities/addressingUnit/vnmEn.pdf>

The 2018.3 release includes new data for the new national postcodes. To optimize the delivery service and improve quality for items sent to Viet Nam, we encourage all mailers to use these new postcodes for all mail deliveries to Viet Nam.

- **French Southern Territories (ATF)**— French Southern Territories has moved from a C-level to a B-level country.

Database Compatibility

Although the Third Quarter 2018 Database is compatible with the previous CODE-1 Plus™ International 1.8.3 software versions, it is highly recommended that you install the CODE-1 Plus™ International 1.8.4 software in order to benefit from the enhancements included in the 1.8.4 release. The key structure of the databases remains the same.

Installation

Installation Overview

The International Postal Database file is over 7 GB in size. Media delivery has been discontinued. However, you may request and receive backup media for a nominal fee from the estore.

- **Windows, Linux, and Unix**—The CODE-1 Plus™ International 1.8.4 Third Quarter 2018 Database (ASCII files) is available on the estore web site, <http://store.pbinsight.com>.
- **Mainframe**—The CODE-1 Plus™ International 1.8.4 Third Quarter 2018 Database (EBCDIC files) is available on the estore web site, <http://store.pbinsight.com>. You must use the JCL members ICPALOCF and ICPDBIND provided with the 1.8.4 software load to install the Third Quarter 2018 Database.

Installing on Windows

1. Download the database from the estore web site, <http://store.pbinsight.com>. The database is downloaded as a zip file. Unzip the database before proceeding with the installation.
2. Select **Start > Programs > CODE-1 Plus International > Database Load**.
3. Specify the path for the file(s) you extracted by using the browse feature. Click **Open**.
4. Click **Browse** to change to a new location or **Next** to accept this path. When browsing, once you have reached the folder containing the extracted file(s), highlight any file and click **Open**, then **Next**.
5. Loading begins and a progress bar displays. When this completes, you are returned to the Database Load Utility screen to carry out any other database installations.

Installing on Unix or Linux

1. Download the database from the estore web site, <http://store.pbinsight.com>. The database is downloaded as a zip file. Unzip the database before proceeding with the installation.
2. Source the <ICP Location>/bin/setup script.
3. From <ICP Location>/bin, enter the `installdb` command to run the database loader.
4. Follow the prompts during the rest of the installation process.

Installing on z/OS

1. Download the database from the estore web site, <http://store.pbinsight.com>. The database is downloaded as a zip file. Unzip the database before proceeding with the installation.
2. Store the files on a local drive/directory.
3. Log onto your mainframe and locate the installation library for CODE-1 Plus™ International.
4. Locate DASD space to accommodate the product database. Note: Approximately 9000 cylinders are needed to load the database.
5. Locate and customize the ICPALOCF member to suit your site standards, then submit the member. The ICPALOCF member will allocate temporary/sequential file(s) on the mainframe, then upload the downloaded file(s) to the mainframe. To accommodate an increase in file size for the TAPBLK01.CD raw EBCDIC database file, modify this statement to add `DSNTYPE=LARGE` and `SPACE=(CYL,(5000,4000))`:

```
// TAPBLK01 DD DSN=QUALITY.ICP.DBTEMP.TAPBLK01,DISP=(NEW,CATLG),
//          UNIT=SYSDA,DSNTYPE=LARGE,
//          DCB=(RECFM=F,LRECL=24576,BLKSIZE=24576,DSORG=PS),
//          SPACE=(CYL,(5000,4000))
```

6. Locate and customize the ICPDBIND member to suit your site standards, then submit the member. The ICPDBIND member creates the appropriate VSAM database file(s) from the sequential files uploaded in the prior step and then removes the flat files from the mainframe. To accommodate an increase in file size for the G1ICPCC, G1ICCTY, and G1ICPCS files, change the `RECORDS` statement to:

```
RECORDS(500000 3000)
```

Country Levels

The Third Quarter 2018 International Postal Database currently recognizes the following countries at the listed level:

- **Level A**—Street-level data is provided.
- **Level B**—City and/or postal code data is provided.
- **Level C**—Country data is provided.
