Confirm Task Processor

Connector Agent 6
Confirm Task Processor

The Confirm Task Processor is an individual component within the Confirm release package and is installed as a Windows service through its installer. It supports processing of the Agents that are available within the 'Scheduled Tasks' screen.

In this section

Connector Agent 6
Connector Agent

Overview
This Agent polls configured directories for files which are then sent to the Confirm Connector. This provides a way of accessing the functionality without the need for sending requests to a Web Service.

Configure the Import Transformations screen within the Confirm Client application with a 'Process Type' of 'Connector Agent'. When files are found to be processed they will be transformed (if required) and sent to the Connector.

Note:  
- The resulting XML cannot contain an 'Authentication' element as the Task Processor user details will be used.
- Each file can only contain one XML transaction.
- This Agent requires the Confirm Connector to be installed on the same machine as the Task Processor in order to process.
