

MailStream Plus™ Release 8.3.3 S01 - Required Product Update Announcement

NOTICE: This is a required product update. Please apply it as soon as possible. You must install software release 8.3.3, before installing the S01 update.

Dear MailStream Plus™ User:

MailStream Plus™ 8.3.3, Product Update S01, is required on all platforms to correct these issues:

- MSPLUS-8773 - EP ROL is not moving AADC letter trays from the SCF entry point to the NDC entry point when the trays are not eligible to receive the SCF discount.
- MSPLUS-8763 - The Header record is not generated in the Shipping Services File (SSF).
- MSPLUS-8796 - AADC letter trays that contain mail pieces for multiple SCFs are not receiving DSCF rates when placed on an SCF pallets.

We would like to highlight a change that was included with the January 9, 2017 release of MailStream Plus™ 8.3.3. We updated the INKJET file produced by MailStream Plus™. The Manifest Rate Code format has increased from five to six bytes, affecting the INKJET file, positions 206 through 222.

The new layout for these positions is:

| Positions | Description | Length |
|-----------|-------------------------|---------|
| 206-212 | Piece Number | 7 bytes |
| 213 | Filler | 1 byte |
| 214-215 | Piece Weight, in ounces | 2 bytes |
| 216 | Filler | 1 byte |
| 217-222 | Manifest Rate Code | 6 bytes |

Your contact of record will soon receive the digital shipment notification for each platform. The notification will include both eStore and Support Site download options. If you have any questions, please use our [Online Case Management System](#) to create a support request. If you have not previously logged in to the Online Case Management System, you will be prompted to create your account credentials. Call 1-800-367-6950 to speak with a Support Representative.

Regards,
The MailStream Plus™ Team
